Visual Politics of Psychoanalysis Griselda Pollock, 2013-10-08 In this innovative collection a distinguished group of international authors dare to think psychoanalytically about the legacies of political violence and suffering in relation to post traumatic cultures worldwide They build on maverick art historian Aby Warburg's project of combining social cultural anthropological and psychological analyses of the image in order to track the undercurrents of cultural violence in the representational repertoire of Western modernity Drawing on post colonial and feminist theory they analyze the image and the aesthetic in conditions of historical trauma from enslavement and colonization to the Irish Famine from Denmark's national trauma about migrants and cartoons to collective shock after 9/11 from individual traumas of loss registered in allegory to newsreels and documentaries on suicide bombing in Israel Palestine and from Kristeva's novels to Kathryn Bigelow's cinema

Redrawing the Historical Past Martha J. Cutter, Cathy J. Schlund-Vials, 2018-04 Redrawing the Historical Past examines how multiethnic graphic novels portray and revise U.S. history This is the first collection to focus exclusively on the interplay of history and memory in multiethnic graphic novels Such interplay enables a new understanding of the past The twelve essays explore Mat Johnson and Warren Pleece's Incognegro Gene Luen Yang's Boxers and Saints GB Tran's Vietnamera Scott McCloud's The New Adventures of Abraham Lincoln Art Spiegelman's post Maus work and G Neri and Randy DuBurke's Yummy The Last Days of a Southside Shorty among many others The collection represents an original body of criticism about recently published works that have received scant scholarly attention The chapters confront issues of history and memory in contemporary multiethnic graphic novels employing diverse methodologies and approaches while adhering to three main guidelines First using a global lens contributors reconsider the concept of history and how it is manifest in their chosen texts Second contributors consider the ways in which graphic novels as a distinct genre can formally renovate or intervene in notions of the historical past Third contributors take seriously the possibilities and limitations of these historical revisions with regard to envisioning new different or even more positive versions of both the present and future As a whole the volume demonstrates that graphic novelists use the open and flexible space of the graphic narrative page in which readers can move not only forward but also backward upward downward and in several other directions to present history as an open realm of struggle that is continually being revised Contributors Frederick Luis Aldama Julie Buckner Armstrong Katharine Capshaw Monica Chiu Jennifer Glaser Taylor Hagood Caroline Kyungah Hong Angela Lafien Catherine H Nguyen Jeffrey Santa Ana and Jorge Santos

Understanding Time And Space: An Invitation To The Theory Of Relativity For Anyone Who Is Now, Or Has Ever Been, An Inquisitive High School Student Steven E Landsburg, 2025-06-20 Understanding Time and Space is an invitation to the theory of relativity for anyone who is now or has

ever been an inquisitive high school student Relativity can seem violently counterintuitive It says that different observers can describe the world in very different ways and they can all be correct It helps to be reminded that you've known this since childhood when you learned that the direction you call left might be the same as the direction I call right and we can both be correct This book illuminates and demystifies the theory of relativity through repeated analogies to that kind of everyday experience Dozens of drawings analogous to the maps we all use to navigate through ordinary space emphasize that relativity is a branch of geometry the geometry of navigating through that more mysterious venue called spacetime The reader is assisted by exercises sprinkled throughout and by dangerous curve sections that identify and combat the most common misunderstandings Steven Landsburg is a professor at the University of Rochester He has published widely in mathematics economics physics and philosophy His hobby is answering questions about relativity on the internet which has taught him a lot about how to be helpful
