Charting a Course to Standards-Based Grading Tim R. Westerberg, 2016-08-24 What's the best way to ensure that grading policies are fair accurate and consistent across classrooms How can schools transition to a grading system that better reflects what students are actually learning Tim R Westerberg makes this journey easier by offering a continuum of options with four destinations on the road to improved grading and assessment Destination

1 critically examines such popular grading mechanisms as the zero extra credit the semester killer project averaging mixing academic performance with work ethic and refusing to accept late work and explains how they undermine objectivity and instead result in widely divergent grades for comparable work with major consequences for students Destination 2 invites educators to put assessment and grading into the larger context of a districtwide guaranteed and viable curriculum and lays out the organizational conditions and necessary steps to accomplish this goal Destination 3 brings parents and others on board with a multiyear implementation plan and community engagement strategies for introducing report cards that indicate student achievement by standards rather than or in addition to letter grades Destination 4 competency based education involves a total rethinking of the nature and structure of school leading to individualized education for all students However far they choose to go administrators and teacher leaders can turn to Charting a Course to Standards Based Grading for the quick wins and long term support and guidance they need to make the trip well worth the effort Truth in Grading David T. Whitney, John J. Culligan, Paul Brooksher, 2004-05 In the past decade an unprecedented trend toward accountability has emerged in American public education With the advent of computerized grading stakeholders often have instant access to student grades Consequently teacher grading practices are under intense scrutiny Since 2004 Truth in Grading has been helping schools avoid problems and potentially serious consequences that can result from flawed or careless assessment practices A practical guide Truth in Grading assists educators in developing and improving learning assessment practices As our state moves forward with the implementation of rigorous standards based curriculum it is critical that a discussion of the purpose and process of grading and assessment take place Truth in Grading provided the catalyst for our conversation in Paulding County Trudy Sower Superintendent Paulding County School District Georgia Truth in Grading is a great professional tool for any staff ready to examine the teaching profession's dark little secrets with regard to ineffective or inaccurate grading practices It masterfully examines this issue from both teacher and administrator points of view Common problems with current practice are clearly outlined and the foundation for teachers and administrators to create their own applicable solutions are provided Susan M White Principal Cedar Hill Elementary Gwinnett County Georgia With competition for slots in American universities increasing the examination of how to evaluate student effort and work should be thoughtfully reconsidered by every teacher As a veteran teacher I found that Truth in Grading presented excellent questions and ideas to be pondered Since educators are about teaching learning and what is best for students this topic deserves a more careful examination For those who want to ensure fair and accurate evaluations for every student Truth in Grading is a must read Michael Cheatham Middle School Teacher Grading for Equity Joe Feldman, 2018-09-25 Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed This must have book will help teachers learn to implement improved equity focused grading for impact Zaretta Hammond Author of Culturally Responsive Teaching The Brain Crack open the grading conversation Here at last and none too soon is a

resource that delivers the research base tools and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With *Grading for Equity*, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, *Grading for Equity* provides a critical historical backdrop describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a fixed mindset about students' academic potential. Practices that are still in place a century later. A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a true north orientation toward equitable grading practices. Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness. Reflection tools for facilitating individual or group engagement and understanding. As Joe writes, "Grading practices are a mirror, not just for students but for us as their teachers. Each one of us should start by asking, 'What do my grading practices say about who I am and what I believe?' Then let's make the choice to do things differently with *Grading for Equity* as a dog-eared reference." [What We Know About Grading](#) Thomas R. Guskey, Susan M.

Brookhart, 2019-02-04 Grading is one of the most hotly debated topics in education, and grading practices themselves are largely based on tradition, instinct, or personal history or philosophy. But to be effective, grading policies and practices must be based on trustworthy research evidence. Enter this book, a review of 100-plus years of grading research that presents the broadest and most comprehensive summary of research on grading and reporting available to date, with clear takeaways for learning and teaching. Edited by Thomas R. Guskey and Susan M. Brookhart, this indispensable guide features thoughtful, thorough dives into the research from a distinguished team of scholars geared to a broad range of stakeholders, including teachers, school leaders, policymakers, and researchers. Each chapter addresses a different area of grading research and describes how the major findings in that area might be leveraged to improve grading policy and practice. Ultimately, Guskey and Brookhart identify four themes emerging from the research that can guide these efforts: Start with clear learning goals; Focus on the feedback function of grades; Limit the number of grade categories; and Provide multiple grades that reflect product, process, and progress criteria. By distilling the vast body of research evidence into meaningful, actionable findings and strategies, this book is the jump start all stakeholders need to build a better understanding of what works and where to go from here.
