Dissertation Index, 1984 Immortality and the Existence of God David Apolloni, 2024-08-15 Immortality and the Existence of God Reformulating the Arguments of Plato Anselm and G del defends a modern version of Plato s argument for the immortality of the soul The self is essentially conscious and hence essentially living It is therefore deathless and cannot receive death But then it also cannot become something else nor can it be destroyed since that would be receiving death also So the self or immortal and immaterial The book then considers materialist theories of the mind and rejects them It formulates an argument from introspection which the author believes establishes substance dualism The argument for immortality and the Ontological Argument for the existence of God are parallel in that attempt to establish the existence of necessary beings Since immortality makes sense within a theistic context the second half of the book defends a version of G del s Ontological Argument for God s existence utilizing experience of the moral good and that mutual entailment of the attributes of God to argue that these attributes including necessary existence are logically coherent In the final chapter the author uses the central arguments in the book to support accounts of the afterlife from those who have had near death experiences **A thought is like a Comet - A final Verdict** Prabhakaran Shulaka, 2025-09-20 This book explores the
