European Traditions in Didactics of Mathematics Werner Blum, Michèle Artigue, Maria Alessandra Mariotti, Rudolf Sträßer, Marja Van den Heuvel-Panhuizen, 2019-02-18 This open access book discusses several didactic traditions in mathematics education in countries across Europe including France the Netherlands Italy Germany the Czech and Slovakian Republics and the Scandinavian states It shows that while they all share common features both in the practice of learning and teaching at school and in research and development they each have special features due to specific historical and cultural developments The book also presents interesting historical facts about these didactic traditions the theories and examples developed in these countries

Family Background and University Success Claire Crawford, Lorraine Dearden, John Micklewright, Anna Vignoles, 2016-11-10 Why do fewer teenagers in England from disadvantaged backgrounds go to university than young people from better off families Once at university how well do poorer students fare compared with other students who drops out from university and who gets the best degrees After university

who secures better jobs and higher pay What really has been the impact on university entry of the controversial increases in tuition fees in 2006 and 2012 especially for students from poorer families Is there no alternative to charging for university places and what do other countries do What should governments universities and schools do to reduce the gaps in university entry and success by family background And what advice can be given to families and young people themselves deciding between the costs and benefits of university This book answers these questions using the latest available evidence drawing on a wealth of data from administrative records of the school and university system and sample surveys of young people and their families The authors analysis of the situation in England is set against a background of evidence for other countries The book provides much needed dispassionate analysis of issues that are at the forefront of both public policy and popular debate on higher education around the world today

Organisational Behaviour Jack Maxwell Wood, Retha Wiesner, Rachel R. Morrison, Aharon Factor, Tui McKeown, 2024-10-28 The sixth Australasian edition of Organisational Behaviour Core Concepts and Applications stands as an exemplary resource tailored for one semester courses in Organisational Behaviour With a deliberate focus on succinctness relevance and visual presentation its fourteen chapters are meticulously crafted to captivate rather than inundate students Throughout the text a plethora of case studies and real world instances delve into how organisations across the Australian New Zealand and Asian regions navigate pressing contemporary business concerns These include the imperative of sustainable business practices grappling with environmental impact and climate change mitigating the gender pay gap addressing employee stress fostering resilience and work life balance adapting to the dynamics of millennials and an ageing workforce enhancing employee retention strategies and navigating the complexities of globalisation and outsourcing Additionally topics such as fostering diversity in the workplace responding to the workforce transformations precipitated by the COVID 19 pandemic managing remote teams effectively honing crisis management skills and harnessing the potential of emerging technologies particularly the ascendancy of generative artificial intelligence AI tools are comprehensively explored This latest edition amplifies its focus on sustainability entrepreneurial and adaptive leadership and the pivotal role of technology in catalysing digital transformation within organisational contexts

Complemented by the latest research in the field this text provides a thorough analysis of contemporary organisational behaviour

Probability, Choice, and Reason Leighton Vaughan Williams, 2021-09-15 Much of our thinking is flawed because it is based on faulty intuition By using the framework and tools of probability and statistics we can overcome this to provide solutions to many real world problems and paradoxes We show how to do this and find answers that are frequently very contrary to what we might expect Along the way we venture into diverse realms and thought experiments which challenge the way that we see the world Features An insightful and engaging discussion of some of the key ideas of probabilistic and statistical thinking Many classic and novel problems paradoxes and puzzles An exploration of some of the big questions involving the use of choice and reason in an uncertain world The application of probability statistics and

Bayesian methods to a wide range of subjects including economics finance law and medicine Exercises references and links for those wishing to cross reference or to probe further Solutions to exercises at the end of the book This book should serve as an invaluable and fascinating resource for university college and high school students who wish to extend their reading as well as for teachers and lecturers who want to liven up their courses while retaining academic rigour It will also appeal to anyone who wishes to develop skills with numbers or has an interest in the many statistical and other paradoxes that permeate our lives Indeed anyone studying the sciences social sciences or humanities on a formal or informal basis will enjoy and benefit from this book

The Shifting Global World of Youth and Education Mabel Ann Brown, 2017-08-15 The Shifting Global World of Youth and Education explores how increasing migration and population changes are having an unprecedented impact on global education Given that the number of children of migrant background is growing internationally there is a need for increasing awareness of the educational attainment and cultural integration of this population group This book presents international perspectives on migration and youth and analyses what kinds of effects such demographic changes are having on educational systems around the world The chapters in this volume provide a fascinating insight into how countries around the world are dealing with loss or growth in their young population as well as changes to their education systems Written by specialist academics from the relevant country the book covers Cuba Lithuania the United Kingdom the United States Finland Greece Germany Austria Hungary Latvia China Australia India Italy and Poland Taking into consideration the countries social and political context the chapters discuss educational issues surrounding curriculum assessment and the opportunities available for the support of young people Conclusions are drawn about what could be done in the future for the benefit of both the migrant and the existing populations The Shifting Global World of Youth and Education will be of great interest to academics researchers and postgraduate students in the disciplines of education sociology political sciences and social work The book will also give secondary teachers teaching assistants social workers and youth workers the opportunity to reflect on their role within a national and international context

The Money Formula Paul Wilmott, David Orrell, 2017-06-12 Explore the deadly elegance of finance's hidden powerhouse The Money Formula takes you inside the engine room of the global economy to explore the little understood world of quantitative finance and show how the future of our economy rests on the backs of this all but impenetrable industry Written not from a post crisis perspective but from a preventative point of view this book traces the development of financial derivatives from bonds to credit default swaps and shows how mathematical formulas went beyond pricing to expand their use to the point where they dwarfed the real economy You'll learn how the deadly allure of their ice cold beauty has misled generations of economists and investors and how continued reliance on these formulas can either assist future economic development or send the global economy into the financial equivalent of a cardiac arrest Rather than rehash tales of post crisis fallout this book focuses on preventing the next one By exploring the heart of the shadow economy you'll be better prepared to ride the

rough waves of finance into the turbulent future Delve into one of the world's least understood but highest impact industries Understand the key principles of quantitative finance and the evolution of the field Learn what quantitative finance has become and how it affects us all Discover how the industry's next steps dictate the economy's future How do you create a quadrillion dollars out of nothing blow it away and leave a hole so large that even years of quantitative easing can't fill it and then go back to doing the same thing Even amidst global recovery the financial system still has the potential to seize up at any moment The Money Formula explores the how and why of financial disaster what must happen to prevent the next one

Attracting and Keeping the Best Teachers Anna Sullivan, Bruce Johnson, Michele Simons, 2019-08-26 This book challenges dominant thinking about early career teachers and their work It offers an in depth and critical analysis of policies concerning the work of early career teachers and how they are supported during this critical period when they are highly vulnerable to leaving the profession Moreover the book provides examples from actual practice that illustrate how to help early career teachers make a successful transition into the profession These practices promote early career teachers development and help the profession as a whole to capitalize on the new knowledge and skills that these teachers bring to their classrooms and their students The book is divided into two main parts Part 1 deals with the difficult to define process of retaining early career teachers and its respective chapters consider this broad issue from an international perspective They explore how policies and practices have an impact on what happens in schools and what it means to be a teacher and to teach In turn Part 2 focuses on the need to reconsider the policies and practices that create the problem of early career teachers and offers alternative ways forward Each chapter addresses a specific aspect of the early career teacher retention issue contributing to a greater understanding of how we can rethink the work of early career teachers so that they can more successfully transition into the profession

Quantum Economics David Orrell, 2018-07-05 A decade after the financial crisis there is a growing consensus that economics has failed and needs to go back to the drawing board David Orrell argues that it has been trying to solve the wrong problem all along Economics sees itself as the science of scarcity Instead it should be the science of money which plays a surprisingly small role in mainstream theory And money is a substance that turns out to have a quantum nature of its own Just as physicists learn about matter by studying the exchange of particles at the subatomic level so economics should begin by analysing the nature of money based transactions Quantum Economics therefore starts with the meaning of the phrase how much or to use the Latin word quantum From quantum physics to the dualistic properties of money via the emerging areas of quantum finance and quantum cognition this profoundly important book reveals that quantum economics is to neoclassical economics what quantum physics is to classical physics a genuine turning point in our understanding

Twisted Logic Leighton Vaughan Williams, 2024-07-03 Twisted Logic Puzzles Paradoxes and Big Questions delves into the intriguing world of twisted logic where everyday conundrums bewildering paradoxes and life's big questions are investigated and decoded Crafted for the curious mind this book sheds light on how

our intuition and common sense can often mislead us Without the need for technical jargon or mathematical prowess it serves as your personal compass through fascinating intellectual landscapes and ultimate explorations From the quirky corners of Bayesian reasoning to practical strategies in daily choices this is your companion for a clearer way of thinking Features A comprehensive toolkit to refine your cognitive processes and avoid common pitfalls Insights into the oddities of probability strategy and fate that govern our lives A fresh perspective on everyday decisions and life s larger dilemmas including finding everything from a place to eat to a new home to a life partner Practical advice on optimising daily routines such as determining the best time of day to arrange important appointments Thought provoking When Should We questions that challenge us to think critically about decision making in our lives Prepare to challenge your perceptions and unveil hidden truths Twisted Logic is an enlightening adventure that promises to transform the mundane into the extraordinary Embark on a journey where the only thing certain is the thrill of the unknown EMBEC & NBC 2017 Hannu Eskola, Outi Väisänen, Jari Viik, Jari Hyttinen, 2017-06-12 This volume presents the proceedings of the joint conference of the European Medical and Biological Engineering Conference EMBEC and the Nordic Baltic Conference on Biomedical Engineering and Medical Physics NBC held in Tampere Finland in June 2017 The proceedings present all traditional biomedical engineering areas but also highlight new emerging fields such as tissue engineering bioinformatics biosensing neurotechnology additive manufacturing technologies for medicine and biology and bioimaging to name a few Moreover it emphasizes the role of education translational research and commercialization **The Northwestern Miller** ,1920 **Maritime Technology and Engineering** Carlos Guedes Soares, T.A. Santos, 2014-09-30 Maritime Technology and Engineering includes the papers presented at the 2nd International Conference on Maritime Technology and Engineering MARTECH 2014 Lisbon Portugal 15 17 October 2014 The contributions reflect the internationalization of the maritime sector and cover a wide range of topics Ports Maritime transportation Inland navigat *The Times Index* ,2010 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement **Moody's Manual of Investments** John Sherman Porter, 1962 American government securities 1928 53 in 5 annual vols v 1 Railroad securities 1952 53 Transportation v 2 Industrial securities v 3 Public utility securities v 4 Government securities 1928 54 v 5 Banks insurance companies investment trusts real estate finance and credit companies 1928 54 The Compact Edition of the Oxford English Dictionary Sir James Augustus Henry Murray, 1971 Micrographic reproduction of the 13 volume Oxford English dictionary published in 1933
