Timing-Belt Procedure

(In only 175 easy steps!)

Subject: 1987 Porsche 928 S4 Automatic
Mileage: 119,177
VIN: WPOUBO928HS860179 (early build, August 1986)
Engine #: M28/42 - 81H05136
November 10-13, 2000

At 82½ inches long, the Porsche 928 timing-belt is one of the longest ever used in a production automobile. Its purpose is to turn the camshafts, thus driving the valve train in relation to the crankshaft. In all but the very early 928's a snap of the belt allows the valves and pistons to crash resulting in catastrophic engine (and financial!) damage. Clearly the function of the timing-belt and its related components is absolutely critical.

While Porsche specifies a service interval of 60,000 miles, most 928 specialists recommend a conservative 40-45,000 mile service. Due to its location the water pump should be replaced. Additionally the belt tensioner should be rebuilt and Tony Harkin has some excellent information on his site at <http://members.rennlist.com/v1uhoht/>. Common shop quotes for these services range from \$700 to \$1200.

Due to the nature of the labor other items to consider servicing include: accessory belts, spark plug wires, distributors, rotors, coils, camshaft seals, crank seal, oil pump seals, flush and fill of fresh coolant, upper and lower radiator hoses, and the forward coolant reservoir hose.

This procedure is a compilation of the Workshop Manual, Wally Plumley's [928 Owners Club](#) article, the instructions accompanying Jay Kempf's "Aftermarket Belt Tension Tool", some emailed encouragement from Greg Nichols and Kevin Berez, Dave Roberts' recommendations ([928 Specialists](#)), emails from other [Rennlisters](#), and my own experience. As a rookie moving carefully I took about 22 hours to complete this job. Having the experience I now estimate it could be done in less than half that time.

The basic steps are:

1. Get everything together
2. Remove the front of the engine
3. Remove the timing belt
4. Remove the water pump
5. Remove, rebuild and install the tensioner
6. Install the water pump
7. Install and tighten the new timing-belt
8. Install the front of the engine
9. Break it in

Get everything together
