Travel Holiday ,1994-07 **Enterprise Guidance in Eastern Europe** David Granick,2015-03-08 The sixties were a decade of major reform in the guidance of industry in the socialist countries of Eastern Europe In this comparative study of industrial management the different directions taken by reform in the German Democratic Republic Hungary and Yugoslavia are examined against the pattern shown by Romania a country in which no significant reform has occurred The author focuses on the methods used to coordinate enterprises in the early 1970s The book is the product of a remarkable opportunity eleven months of interviews in the four countries Those interviewed were mainly middle and upper managers of enterprises but also include officials of ministries planning commissions banks trade unions and national Communist parties The resulting data made possible new interpretations of enterprise management in Eastern Europe Originally published in 1976 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **System-Theoretical Urban Development** Manfred Rolfes,Jan Lorenz Wilhelm,2024-02-26 In their book the authors introduce the topic of urban development from a systems theoretical perspective and provide explanatory approaches tips and methodological instructions for dealing with urban complexity Knowing full well that this sometimes amounts to squaring the circle the authors draw on applied systemic approaches and systematically couple these with epistemological currents that can be assigned to Luhmann s systems theory The social understanding of this theory of social systems represents a very good starting point for understanding urban development and urban complexity From this perspective urban development can be seen as a process in which organisations and individuals with their own expectations and perspectives are involved in which contradictions and conflicts seem inevitable and the future cannot be clearly predicted Decisions in cities and municipalities are therefore always associated with risks irritations and unexpected consequences With the Potsdam lodestar approach Rolfes and Wilhelm present a multidimensional approach to managing urban development processes The approach distinguishes five process dimensions which are

presented chapter by chapter and linked with recommendations The individual chapters are structured along guiding questions and feature appealing visualizations and numerous bonus materials
