Davis, 2016-05-02. It may be hard to believe in an era of Walmart, Citizens United and the Koch brothers, but corporations are on the decline. The number of American companies listed on the stock market dropped by half between 1996 and 2012. In recent years we've seen some of the most storied corporations go bankrupt: General Motors, Chrysler, Eastman, Kodak or disappear entirely: Bethlehem Steel, Lehman Brothers, Borders. Gerald Davis argues this is a root cause of the income inequality and social instability we face today. Corporations were once an integral part of building the middle class. He points out that in their heyday they offered millions of people lifetime employment, a stable career path, health insurance and retirement pensions. They were like small private welfare states. The businesses that are replacing them will not fill the same role. For one thing they employ far fewer people: the combined global workforces of Facebook, Yelp, Zynga, LinkedIn, Zillow, Tableau, Zulily and Box are smaller than the number of people who lost their jobs when Circuit City was liquidated in 2009. And in the sharing economy, companies have no obligation to most of the people who work for them: at the end of 2014, Uber had over 160,000 driver partners in the United States but recognized only about 2,000 people as actual employees. Davis tracks the rise of the large American corporation and the economic, social and technological developments that have led to its decline. The future could see either increasing economic polarization as careers turn into jobs and jobs turn into tasks, or a more democratic economy built from the grass roots. It's up to us.

Profit Power Economics Mia de Kuijper, 2009-11-20. A new economy is emerging from the global financial crisis. In this groundbreaking book, seasoned executive and Harvard-trained economist Mia de Kuijper guides readers through the fundamentals of this economy and explains how companies and individuals can create sustainable wealth now. The key is wielding one of twelve contemporary sources of profit power. Control just one and you are on the road to high returns. Turning profit power into sustainable wealth requires new strategies enumerated here for choosing and valuing investments, structuring and managing global enterprises, confronting competitive threats and navigating markets which may increasingly display power law dynamics and where distributions may have fat tails. To derive this book's unique framework for achieving high returns, de Kuijper rethought parts of economic theory itself in light of the most transformative force in the new economy, dubbed the Transparent Economy by de Kuijper: namely, the vanishing cost of information and connectivity. Based on original research and illustrated with lively lessons from the experiences of the author and other successful investors and leaders, *Profit Power Economics* draws a detailed picture of the new competitive arena and gives readers a step-by-step approach to build or find exceptionally high return enterprises and to utilize today's shifting market dynamics to influence choice and build wealth.
