Report On Activities To Combat Human Trafficking:

Combating Human Trafficking Christal Morehouse, 2009-06-19 Human trafficking is one of the most urgent political challenges of our global age. As the UN defines it, human trafficking is essentially a form of non-institutional slavery but also includes the trafficking of human organs. It has been resistant to abolition and difficult to combat. Human trafficking is organized through networks and is clandestine in nature, making it very hard for governments to even detect. Yet it is arguably the most severe form of human exploitation in the world. Traffickers trade in the immediate human suffering of their goods. Human trafficking is a pressing political issue for two key reasons. First, because its victims are often subjected to virtual slavery, exposing them to severe physical and mental abuse. Their rights are brutally violated and they are robbed of their fundamental freedom and dignity. The severity and estimated scope of this abuse has made the issue a priority for the American and German governments. Second, human trafficking is estimated to be one of the top three sources of income globally for organized crime. Only trafficking in drugs and arms surpasses human trafficking as a means for such illegal networks to generate funds. Criminal networks undermine the integrity of democratic states and destabilize their social and economic order. Crime generated from human trafficking provides such networks with the resources they need to sustain a wide range of harmful activities.

Combating Human Trafficking United States. Congress. Senate. Committee on Homeland Security and Governmental Affairs, 2014 *Human Trafficking: Better Data, Strategy, & Reporting Needed to Enhance U.S.*

Anti-trafficking Efforts Abroad, 2006 The U.S. government estimates that 600,000 to 800,000 persons are trafficked across international borders annually.

Human Trafficking Kathryn Cullen-DuPont, 2009 Despite the United Nations having officially abolished slavery and the slave trade more than 60 years ago, millions of human beings continue to be enslaved. Human trafficking, the official term for the modern-day slave trade, consists of buying and selling people with the intent of exploiting them through forced labor or sexual acts. Human Trafficking provides a thorough examination of this issue. It describes the suffering caused by human trafficking as well as the financial and cultural conditions that make modern slavery possible both within and beyond national borders. The efforts of the United Nations, national governments, and nongovernmental organizations to combat human trafficking are thoroughly discussed, as are those to provide direct aid to the individual victims. Human Trafficking is an eye-opening account that examines how the trade is conducted in the United States, the Netherlands, Nigeria, India, and Belize. Each case study analyzes the patterns of trade, the types of exploitation, why countries have failed to halt the practice, and the unrelenting efforts to eradicate human trafficking. The Boundaries of Desire Eric Berkowitz, 2015-08-01 The act of reproduction and its variants never change much but our ideas about the meaning of sex are in constant flux Switch a decade cross a border or traverse class lines and the harmless pleasures of one group become the gravest crimes in another Combining meticulous research and lively storytelling The Boundaries of Desire traces the fast moving bloodsport of sex law over the past century and challenges our most cherished notions about family power gender and identity Starting when courts censored birth control information as pornography and let men rape their wives and continuing through the sexual revolution and into the present day when rape gay rights sex trafficking and sex on the internet saturate the news Berkowitz shows how the law has remained out of synch with the convulsive changes in sexual morality By focusing on the stories of real people Berkowitz adds a compelling human element to what might otherwise be faceless legal battles The law is made by people after all and nothing sparks intolerance on the left and right more than sex Ultimately Berkowitz shows the emptiness of sanctimonious condemnation and argues that sexual questions are too subtle and volatile for simple catch all solutions
