10. Standing issues patterned consisted of issues and propositions. The questions always involved action taken or to be taken by the respondents. Examples: "Should we consider the use of the [displacement]?"

The procedure being a modest effort not improving legal professionals' attitudes positive and negative displacement are negative as adversity. They are the opposite of the existing same displacement.

15. Use the diagram below to compute the distance between two adjacent nodes on a spanning tree network, and the value of α in case of a network computing three bits of distance.

The weights we assign to the features in these neural networks, the so-called *connection weights*, are learned from data. These weights are the parameters of the model.

1. Solve the spring-mass system in the first two problems and compare the equations. Check one of them using the Euler method. Make a plot in Maple. Compare. How are the solutions related to the undamped case?
