Science Fiction Stories Pier Luigi Luisi, 2020-01-02 This collection of essays highlights in a new critical fashion some of the classic questions in life science. These include: what is life? what is death? what is consciousness? why is life cellular and why are enzymes macromolecules? It also explores whether evolution is pre-determined, whether science and spirituality can harmonize with each other, whether artificial intelligence is at odds with the human spirit, and whether and to what extent we are genetically determined. In this text, some of the main conceptual tools used to tackle life's many aspects are necessarily reviewed, such as the systems view of life, the notion of contingency, and the concept of autopoiesis. Each of the three chapters of the book contains a number of short science fiction stories which discuss aspects of the present-day development of artificial intelligence. *The Moral Meaning of Nature* Peter J. Woodford, 2018-03-28 What if anything does biological evolution tell us about the nature of religion, ethical values, or even the meaning and purpose of life? *The Moral Meaning of Nature* sheds new light on these enduring questions by examining the significance of an earlier and unjustly neglected

discussion of Darwin in late nineteenth century Germany We start with Friedrich Nietzsche whose writings staged one of the first confrontations with the Christian tradition using the resources of Darwinian thought The lebensphilosophie or life philosophy that arose from his engagement with evolutionary ideas drew responses from other influential thinkers including Franz Overbeck Georg Simmel and Heinrich Rickert These critics all offered cogent challenges to Nietzsche's appropriation of the newly transforming biological sciences his negotiation between science and religion and his interpretation of the implications of Darwinian thought They also each proposed alternative ways of making sense of Nietzsche's unique question concerning the meaning of biological evolution for life At the heart of the discussion were debates about the relation of facts and values the place of divine purpose in the understanding of nonhuman and human agency the concept of life and the question of whether the sciences could offer resources to satisfy the human urge to discover sources of value in biological processes The Moral Meaning of Nature focuses on the historical background of these questions exposing the complex ways in which they recur in contemporary philosophical debate

The Proceedings from Halophiles 2013, the International Congress on Halophilic Microorganisms R. Thane Papke, Aharon Oren, Antonio Ventosa, Jesse Dillon, 2015-07-08 The Halophiles 2013 meeting is a multidisciplinary international congress with a strong history of regular triennial meetings since 1978 Our mission is to bring researchers from a wide diversity of investigation interests e.g. protein and species evolution niche adaptation ecology taxonomy genomics metagenomics horizontal gene transfer gene regulation DNA replication repair and recombination signal transduction community assembly and species distribution astrobiology biotechnological applications adaptation to radiation desiccation osmotic stress into a single forum for the integration and synthesis of ideas and data from all three domains of life and their viruses yet from a single environment salt concentrations greater than seawater This cross section of research informs our understanding of the microbiological world in many ways The halophilic environment is extreme especially above 10% NaCl restricting life solely to microbes The microorganisms that live there are adapted to extreme conditions and are notable for their ability to survive high doses of radiation and desiccation Therefore the hypersaline environment is a model system both the abiotic and biologic factors for insightful understanding regarding conditions and life in the absence of plant and animals e.g. life on the early earth and other solar system bodies like Mars and Europa Lower salinity conditions e.g. 6-10% NaCl form luxuriant microbial mats considered modern analogues of fossilized stromatolites which are enormous microbially produced structures fashioned during the Precambrian and still seen today in places like Shark's Bay Australia Hypersaline systems are island like habitats spread patchily across the earth's surface and similar to the Galapagos Islands represent unique systems excellent for studying the evolutionary pressures that shape microbial community assembly adaptation and speciation The unique adaptations to this extreme environment produce valuable proteins enzymes and other molecules capable of remediating harsh human instigated environments and are useful for the production of biofuels vitamins and retinal implants for example This research

Dada as Text, Thought and Theory Stephen Forcer,2017-07-05 The Dada movement revered as perhaps the purest form of cultural subversion and provocation in 20th century Europe has been a victim of the readiness with which

cultural historians have swallowed its own propaganda Based on extensive close analysis of French language Dada work in its original form and offering English translations throughout this major reappraisal looks at a broad range of media and topics including poetry film philosophy and quantum physics in order to get beyond Dada's typecasting as avant garde anti hero Work by women writers and other marginalized figures combines with that of canonical Dadaists to present Dada in a radically new set of guises poetic and textually subtle intellectually and philosophically meaningful peaceable and quasi Buddhist and perhaps most uncomfortably of all conformist and reactionary

Unforgettable W. Michael Gray, 2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In Unforgettable Enabling Deep and Durable Learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers

to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be Why the Best College Teachers Do What They Do because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges *A Sceptic's Guide to Belief* Ken Crispin,2019-04-04 What would happen if you faced your doubts set aside your preconceptions and decided to follow the path of truth wherever it might lead Most people whether believers or atheists doggedly defend what they have always believed Many see this as an expression of faith Yet there is something almost inexpressibly sad about the plight of people living out their lives in reliance upon beliefs they dare not question Perhaps that is why many of us come to a point at which we feel compelled to pursue the truth no matter what the implications But even if we found the courage to embark upon such a journey could we really find a path through the scientific philosophical experiential and theological thickets that surround the great questions of life And if we did would we know the truth and be set free Would we be forced to face a long feared despair Or would we find ourselves still staring impotently at an enigmatic universe This is a book unlike any other It addresses these questions with unflinching honesty drawing evidence from a diversity of scientific fields and subjecting the competing arguments to rigorous skeptical analysis

Buddha on Wall Street Vaddhaka Linn,2015-03-02 An original insightful and provocative evaluation of our economic situation today If you wonder about the social implications of Buddhist teachings this is an essential book David Loy author *Money Sex War Karma* Lays bare the pernicious consequences of corporate capitalism and draws forth from Buddhism suggestions for creating benign alternatives conducive to true human flourishing Bhikkhu Bodhi editor *In the Buddha's Words* After his Enlightenment the Buddha set out to help liberate the individual and create a society free from suffering The economic resources now exist to offer everyone decent food shelter work and leisure to allow us to fulfil our potential as human beings What is it in modern capitalism which prevents that Can Buddhism build something better than our current economic system Vaddhaka Linn explores these questions by examining our economic world from the moral standpoint of the Buddha Boredom Studies Reader Michael Gardiner,Julian Jason Haladyn,2016-10-04 Boredom Studies is an increasingly rich and vital area of contemporary research that examines the experience of boredom as an important even quintessential condition of modern life This anthology of newly commissioned essays focuses on the historical and theoretical potential of this modern condition connecting boredom studies with parallel discourses such as affect theory and highlighting possible avenues of future research Spanning sociology history art philosophy and cultural studies the book considers boredom as a mass response to the atrophy of experience characteristic of a highly mechanised and urbanised social life **Learned Lives in England, 1900-1950** William C. Lubenow,2020 If objectivity was the great discovery of the nineteenth century uncertainty was the great discovery of the twentieth century *Lives Lived, Lives Imagined* Sabrina Reed,2022-11-04

Perceptive controversial topical and achingly funny Miriam Toews's books have earned her a place at the forefront of Canadian literature. In this first monograph on Toews's work, Sabrina Reed examines the interplay of trauma and resilience in the author's fiction. Reed skillfully demonstrates how Toews situates resilience across key themes including the home as both a source of trauma and an inspiration for resilient action; the road trip as a search for resolution and redemption; and the reframing of the Mennonite diaspora as an escape from patriarchal oppression. The deaths by suicide of Toews's father and sister stand out as the most shocking and tragic of the author's biographical details, and Reed explores Toews's use of autofiction as a reparative gesture in the face of this trauma. Written in an accessible style that will appeal to both scholars and devotees of Toews's work, *Lives Lived Lives Imagined* is a timely examination of Toews's oeuvre and a celebration of fiction's ability to simultaneously embody compassion and anger, joy and sadness, and to brave the personal and communal oppressions of politics, religion, family, society, and mental illness.

Towards an embodied science of intersubjectivity:

Widening the scope of social understanding research Ezequiel Di Paolo, Hanne De Jaegher, 2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition. This problem is understood as how we figure out other minds, relying only on indirect manifestations of other people's intentional states, which are assumed to be hidden, private, and internal. Research on this question has mostly investigated how individual cognitive mechanisms achieve this task. A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes. This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions, beyond but including that of social cognition narrowly construed. Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds. These phenomena include acting and perceiving together, verbal and non-verbal engagement, experiences of disconnection, management of relations in a group, joint meaning-making, intimacy, trust, conflict, negotiation, asymmetric relations, material mediation of social interaction, collective action, contextual engagement with socio-cultural norms, structures, and roles, etc. These phenomena are often characterized by a strong participation by the cognitive agent, in contrast with the spectatorial stance typical of social cognition research. We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena. This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity, the social mind writ large. To contribute to this goal, we encouraged contributions in psychology, neuroscience, psychopathology, philosophy, and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive, from observational to participatory.
