Teaching Primary Drama Brian Woolland, 2014-04-23 Assuming no prior knowledge or experience of drama teaching Brian Woolland's *Teaching Primary Drama* offers a comprehensive introduction to the teaching of drama in the primary school and focuses on current initiatives in primary education including the primary literacy strategy. The text is an invaluable resource for any teacher wishing to adopt a creative approach to teaching in their classroom. It offers guidance on different drama methods and each practical idea translates to all areas of the curriculum. *Teaching Primary Drama* is written in simple terms uncluttered by references, is refreshingly straightforward and succinct and does not fall into the trap of making a complex subject sound complex, a trait of some texts which can push non-specialists away. Amanda Kipling, London Drama Magazine Summer 2010 issue

Developing Children's Critical Thinking through Picturebooks Mary Roche, 2014-07-25 This accessible text will show students and class teachers how they can enable their pupils to become critical thinkers through the medium of picturebooks. By introducing children to the notion of making meaning together through thinking and discussion, Roche focuses on carefully chosen picturebooks as a stimulus for discussion and shows how they can constitute an accessible multimodal resource for adding to literacy skills while at the same time developing in pupils a far wider range of literary understanding. By allowing time for thinking about and digesting the pictures as well as the text and then engaging pupils in classroom discussion, this book highlights a powerful means of developing children's oral language ability, critical thinking and visual literacy while also acting as a rich resource for developing children's literary understanding. Throughout, Roche provides rich data and examples from real classroom practice. This book also provides an overview of recent international research on doing interactive read-alouds, on what critical literacy means, on what critical thinking means, and on picturebooks themselves. Lecturers on teacher education courses for early years or primary levels, classroom teachers, pre-service education students, and all those interested in promoting critical engagement and dialogue about literature will find this an engaging and very insightful text.

Children Reading Pictures Evelyn Arizpe, Morag Styles, 2004-08-02 This book describes the fascinating results of a two-year study of children's responses to contemporary picturebooks. Children of primary school age from a range of backgrounds read and discussed books by the award-winning artists Anthony Browne and Satoshi Kitamura. They then made their own drawings in response to the books. The authors found that children are sophisticated readers of visual texts and are able to make sense of complex images on literal, visual and metaphorical levels. They are able to understand different viewpoints, analyse moods, messages and emotions and articulate personal responses to picturebooks even when they struggle with the written word. With colour illustrations and interviews with the two authors whose books were included in the study, this book demonstrates how important visual literacy is to children's understanding and development. Primary and Early Years teachers, literacy co-ordinators and all those interested in children's literature will find this a captivating read.
