The present book investigates if the implementations of the given success factors are leading to a successful implementation of a workflow based IT change and release management application. Moreover, further success factors will be introduced and discussed. First, the author discusses the HR change management in relation with the eight step model of Kotter and the outcome of its critical success factors in business. Secondly, the effectiveness of the ITIL reference model is explored in a research study. The ITIL reference model defines critical success factors for a successful IT change and release management implementation. The book uses for its purpose the ITIL reference model, the process issues, publications of the official ITIL source, and the literature of Laudon and Laudon. In addition, other important researchers are taken into account. The findings are integrated into the questionnaire and the interviews, and further they are used for an initial assessment.

Engaging Chinese Students in Teaching and Learning at Western Higher Education Institutions Karen Burrows, 2016-09-23 There has been an increase over the past decade in the number of Chinese students studying in western Higher Education Institutions, with figures expected to increase over the next 10 years. However, this has proved particularly challenging for the lecturers in these Institutions regarding how best to engage and teach this particularly unique student group. The Chinese student presents these challenges due to the many cultural and language differences that can be identified, as well as to the western teacher's perception of how these students like to be taught. This book disputes such myths and provides a useful guide on what those challenges are, offering practical guidance on how to overcome them. The book firstly identifies and defines the Chinese student studying for a degree in western universities and institutions, before going on to examine and explore the cultural differences by discussing issues around teaching and learning. A chapter focusing specifically on language breaks down the differences in detail, with discussions around tonal language and its impact on the student's understanding. Further chapters discuss attitudes to learning, staff support for teaching this particular group, and finally some practical suggestions on how best to engage the student and enable them to achieve. *Business and*
