Bullying refers to aggressive behavior of the victim or to create a feeling of fear physical assaults, physical intimidation, teasing, social isolation, and exclusion from other forms of aggressive behavior nature of the bullying act, hence, not all students experience verbal insults by their the level of bullying until the student time. The second characteristic that distinguishes bullying from other forms of aggressive behavior is the status inequality between bully and victim. In comparison, the victim is physically, psychologically, and socially more vulnerable, which allows the bully to engage in the behavior with little concern for reprisals or other consequences. First, it must possess an administration and faculty that are unaware of the extent of bullying behavior and therefore fail to effectively protect vulnerable students from being victimized or to punish those students who engage in bullying behavior. The research is consistent in suggesting that the schools' response to bullying is often ineffective in curbing the problem.
