Topic: Health & Medicine | Words: 607 | Pages: 4

Introduction

Over the past years, lack of sleep has become a health issue affecting a significant number of people across the globe. Many individuals do not obtain enough quality sleep, which then affects their health, and their capacity to undertake their daily routines. SD is caused by aspects such as anxiety and depression which can lead to various effects including, memory issues, trouble with thinking and concentration, high blood pressure, mood changes, and weakened immunity among the victims.

Memory Issues

During sleep, the brain forms a connection that helps a person process and remembers new information. According to Harrington et al. (2018), lack of sleep makes an individual have difficulty remembering things since the brain does not have sufficient time to create new pathways for the information recently learned. Lack of sleep denies the brain the ability to relax and concentrate hence making a person forget easily (Cheung et al., 2019). Thus, a limited nap can negatively impact an individual's short-term and long-term memory.

Weight Gain and Obesity

Further, lack of sleep can lead to excessive eating which makes a person gain weight. Sleep problem is related to higher amounts of a stress hormone called cortisol, the resulting anxiety, stress, and frustration contribute to emotional eating and poor nutritional habits (Chen et al., 2018). With sleep deprivation, the chemicals that signal to a person's brain when full are off balance, as a result, an individual overindulges

Fundamentals of Sleep Technology Teofilo Lee-Chiong, M.D., 2012-06-01 Fundamentals of Sleep Technology provides a thorough understanding of the use of polysomnography and other technologies in the evaluation and management of sleep disorders. Coverage includes in-depth reviews of the neurophysiology and cardiopulmonary aspects of sleep along with the pathophysiology of sleep disorders. Detailed sections on polysomnography include recording procedures, identifying and scoring sleep stages and sleep-related events, and report generation. Chapters discuss therapeutic interventions including positive airway pressure, supplemental oxygen, surgical and pharmacologic treatments, and patient education. A section focuses on pediatric sleep disorders and polysomnography. Also included are chapters on establishing and managing a sleep center and accrediting a sleep program. Fundamentals of Sleep Technology is endorsed by the American Association of Sleep Technologists. AAST committees oversaw the development of this book, defining the table of contents, recruiting the Editors, and providing most of the contributors.

Twenty Years After the Iowa Gambling Task: Rationality, Emotion, and Decision-Making Jong-Tsun Huang, Yao-Chu Chiu, Ching-Hung Lin, Jeng-Ren Duann, 2018-08-21 The world is full of uncertainty. In unpredictable circumstances, can emotions facilitate advantageous decision making? A neuroscience team led by Antonio Damasio explored this question using the Iowa Gambling Task (IGT). To the present day, the findings of numerous IGT-related investigations strongly influence clinical and interdisciplinary research, for example in neuroeconomics and neuromarketing. This special issue examines IGT-based research progress over the past 20 years through literature reviews, clinical examinations, model construction, theoretical integration, and brain imaging technology. Both supportive and opposing viewpoints are provided to frame correlations between rationality, emotion, decision making, and IGT. Potential future directions for IGT studies are discussed.

The Art and Architecture of Academic Writing Patricia Prinz, Birna Arnbjörnsdóttir, 2021-08-15 This book is a bridge to confident academic writing for advanced non-native English users. It emphasizes depth over breadth through mastery of core writing competencies and strategies which apply to most academic disciplines and genres. Tailored to students in EMI programs, the content was piloted and revised during a longitudinal writing study. The innovative approach prepares students to write for the academic community through the dual lenses of Art (developing a writer's voice through choices in language style and topics) and Architecture (mastering norms of academic language genre and organization). The user-friendly text maximizes time for writing practice and production by avoiding lengthy readings. Part 1 builds skills and confidence in writing by focusing on assignments that do not require research. Part 2
