Response To The Data Sharing Review Report:

Surveillance: Report Great Britain. Parliament. House of Lords. Select Committee on the Constitution, 2009 The 2nd report HLP 18 I session 2008 09 ISBN 9780104014257 from the Select Committee on the Constitution examines the relationship between surveillance citizens and the state The Committee sought to answer the following questions i have increased surveillance and data collection by the state fundamentally altered the way it relates to its citizens ii what forms of surveillance and data collection might be considered constitutionally proper or improper Is there a line that should not be crossed How could it be identified iii what effect do public and private sector surveillance and data collection have on a citizen s liberty and privacy iv how have surveillance and data collection altered the nature of citizenship in the 21st century especially in terms of citizens relationship with the state v is the Data Protection Act 1998 sufficient to protect citizens Is there a need for additional constitutional protection for citizens in relation to surveillance and the collection of data The Committee has set out a number of recommendations covering the following areas information commissioners the national DNA database CCTV legislation and the legislative process the Government and Parliament public and private sector organisations A companion volume 2 containing evidence is also available ISBN 9780104014264 *Law Commission: Data Sharing Between Public Bodies - A Consultation Paper No 214* Great Britain: Law Commission, 2011 *Altruism Reconsidered* Peter Sýkora, Urban Wiesing, 2016-04-01 As the use of human body parts has become increasingly commercialized a need has arisen for new approaches to regulation that moves beyond the paradigm of altruism During the course of this discussion the notion of property has become a key concept Focusing on practical and conceptual perspectives the multidisciplinary group of authors which includes specialists in philosophy law sociology biology and medicine have come together with practicing lawyers to consider both legal provisions and patterns of regulation in countries across Europe Identifying divergences between different legal traditions the authors explore various conceptual models which could be used to improve and to guide policy making With this twin focus on practical and conceptual perspectives this volume sets the standard for a detailed and innovative discussion of issues surrounding the regulation of research on human tissue

Principles and Practice of Emergency Research Response Robert A. Sorenson, 2024-08-31 Unlocking the Future of Infectious Disease Research Response In a world where emerging infectious diseases constantly threaten humanity advances in science and technology promise defense against future pathogens before they cause pandemics The field of emergency research response and preparedness remains in its infancy however Not until the 2014 West African Ebola outbreak was accelerated research broadly recognized as a crucial component of emergency response Many outbreaks and one global pandemic later it is clear the world must be prepared to launch accelerated research responses to prevent or mitigate infectious disease outbreaks epidemics and pandemics Yet this nascent field is rife with critical scientific ethical and policy questions How can local national and global systems collaborate across disciplines and political boundaries to protect health

security How can we conduct rigorous research in fragile or failed nation states What is needed for equitable distribution of vaccines and therapeutic medicines in short supply How can we accelerate trials of vaccines and therapeutics during an emergency without compromising scientific rigor or ethical standards How do we integrate communities and stakeholders into research preparedness and response The editors bring decades of experience to their collaboration with renowned research scientists and health policy experts Together they have crafted a compendium that proposes normative standards and offers practical guidance for preparedness and rapid research response This pioneering open access textbook presents principles and practices forged from experience in health emergencies insights that illuminate a path forward for research response and preparedness The goal is to stop outbreaks from becoming avoidable pandemics and to mitigate illness death and social disruption if they cannot be stopped Principles and Practice of Emergency Research Response merges historical understanding with insights into possible futures It will serve as an indispensable compass for curtailing infectious disease threats through research global health policy changes and research capacity improvements where they are most needed The editors hope that this book will be an ongoing reference for governments health organizations development agencies researchers policy experts ethicists and social scientists To facilitate focused and enhanced learning it incorporates pedagogical tools such as abstracts learning objectives discussion questions real life examples and learning tracks Robust global health security requires effective preparation for and response to emerging and re emerging pathogens This volume should help guide us towards a more resilient future

Privacy and Healthcare Data Christina Munns, Subhajit Basu, 2017-05-15 In order for the information society to realise its full potential personal data has to be disclosed used and often shared This book explores the disclosure and sharing of data within the area of healthcare Including an overview of how health information is currently managed the authors argue that with changes in modern society the idea of personal relationships with a local GP who solely holds and controls your health records is becoming rapidly outdated The authors aim to encourage and empower patients to make informed choices about sharing their health data They do this by developing a three stage theoretical model for change to the roles of the NHS and the individual The study generates debate to stimulate and inspire new models and policy and to provoke new visions for the sharing of healthcare data Such discussion is framed through an exploration of the changing concept of privacy and patient control in healthcare information management The volume draws on best practices from Europe and the USA and combines these to form a suggested vision for the UK as an early adopter of change The volume will be essential reading for academics in the field of privacy and data protection as well as healthcare and informatics professionals across different jurisdictions

Customer Data Sharing Frameworks Anton Didenko, Natalia Jevglevskaia, Ross P. Buckley, 2024-02-15 The proliferation of open banking and open finance regimes across the globe demonstrates an ever increasing interest of policymakers in empowering customers to take control of their data through innovative data sharing frameworks These frameworks mostly operate within a single e g financial services sector

but are poised to extend to other parts of the economy in the future and eventually apply economy wide This book articulates the concept of economy wide customer data sharing CDS frameworks analyses in detail the main challenges associated with the development of such frameworks and is informed by the lessons learned from Australia s world first cross sectoral Consumer Data Right regime It develops a first comprehensive taxonomy of CDS frameworks and offers valuable insights on crucial issues of customer trust information security consumer protection and participant regulation This study apart from its scholarly importance has clear practical value It formulates twelve lessons that will assist governmental officials and other policymakers engaged in establishing and revising data sharing frameworks across the globe It is essential reading for anyone interested or involved in the law and policy related to the sharing of a most precious resource in the modern economy customer data

Evaluation of the Use of Electronic Shipping Papers for Hazardous Materials Shipments William H. Tate, 2012 This report examines the challenges of advancing the use of electronic shipping papers as an alternative to the current paper based hazardous materials communication system Paper copy hazardous materials shipping papers have several drawbacks they are labor intensive and subject to human error they are perishable and may not be available to emergency responders in the event of an incident and they are difficult to exchange between modes or different vehicles within a mode The use of internationally compatible electronic data sharing technologies could significantly improve the exchange of hazardous materials shipping information among shippers carriers regulatory agencies and emergency responders Timely access to accurate hazardous materials shipping information will likely reduce errors in information exchange improve efficiency enhance security and improve the response efforts in the event of a hazardous materials incident

Integrity of Randomized Clinical Trials Khalid S. Khan, 2024-12-26 Today scientists are expected to be more accountable and transparent than at any other time in history Globally the pursuit of knowledge creation enjoys a place of distinction and the public expects to reap considerable benefits from the innovative contributions made by researchers It is therefore more important than ever that ethics transparency and professionalism explicitly guide research integrity Despite the clear importance of acquiring a fundamental understanding of clinical trials in the context of health research and innovation medical training generally fails to cover clinical trial integrity in its curriculum including it neither at the undergraduate nor at the postgraduate levels This new book provides a curriculum to address this gap offering best practice guidelines to improve the quality openness and trustworthiness of clinical trials and filling a current void in the market Key Features The first book on clinical trial integrity Provides clear guidance on how to ensure probity in peer review appraisal of trials and investigation of complaints concerning misconduct in clinical trials Trains and supports researchers globally on how to undertake trials with integrity Ensures that the increasing demand for public documentation of all aspects throughout the lifecycle of a clinical trial can be met This book is essential reading for master

and doctoral students undertaking courses in clinical trials epidemiology and medical statistics and an invaluable reference for medical journal editors and peer reviewers clinicians who recruit patients into trials pharmaceutical industry professionals patient and public representatives who engage in clinical trials systematic reviewers guideline writers and funders and regulators of clinical trials
