assessment in CFL programs and classrooms at various levels this text shows how PCA's culture focused paradigm differs fundamentally from the general communicative language teaching CLT framework and highlights how it can inspire innovative methods to better support learners' ability to navigate target culture and overcome communication barriers. Additional applications of PCA in the development of learner identity, intercultural competence, autonomy and motivation are also considered. Bridging theoretical innovations and the practice of curriculum design and implementation, this work will be of value to researchers, teacher trainers and graduate students interested in Chinese teaching and learning, especially those with an interest in incorporating performance into foreign language curriculums with the goal of integrating language and culture.
