

The Retrograde Motion of Mars

1) On what days does Mars start and end the retrograde motion? (First Observation)

Starts early March

Ends early October

2) On what days does Mars start and end the retrograde motion? (Second Observation)

December 23rd

March 18th

3) Explain why Mars appears to undergo retrograde motion.

Retrograde is Earth's motion across Mars's orbit. Earth has a faster orbit than Mars so it laps Mars in the opposite way it looks as if Mars is going backward in the sky. The closer the planets are to each other, the more noticeable the retrograde motion is.

4) Explain why we see Mars and not some of the Jovian planets for the retrograde.

The Jovian planets are much farther away and their orbits take longer, so the retrogrades would be harder to readily see.

Retrograde Motion Of Mars Lab Answers

Terry C. Jones

Retrograde Motion Of Mars Lab Answers:

As recognized, adventure as competently as experience about lesson, amusement, as well as accord can be gotten by just checking out a ebook **Retrograde Motion Of Mars Lab Answers** with it is not directly done, you could take even more a propos this life, nearly the world.
