Ecological Jurisprudence Alessandro Pelizzon, 2025-01-11 This open access book explores the rise of ecological jurisprudence, a transformative legal theory that challenges traditional legal boundaries. Drawing on over 15 years of research and teaching, the book offers a comprehensive theoretical exploration of this new approach to law via a comprehensive examination of a wide range of initiatives from around the world, as well as a deep theoretical engagement with the implications of this novel legal theory. Covering a breadth of topics never before brought together with such clear and wide ranging scope, this book points to the emergence of an ecological jurisprudence not only as a profound transformation of legal norms but as a radical reimagination of law itself and serves as a vital resource for scholars and practitioners interested in the future of environmental law. Along with Stone's Do Trees Have Standing 1972, Cullinan's Wild Law 2002 and the Ecuadorian Constitution 2008, we can now name Pelizzon's Ecological Jurisprudence as a key milestone in the field. Herman F. Greene, JD, DMin, Thomas Berry Scholar in Residence, The Earth Law Center. An immense gift to the field and to generations of lawyers to come. Ecological Jurisprudence contains teachings from which one could learn for a lifetime. Katarina Hovden, University of Copenhagen. Alessandro Pelizzon's Ecological Jurisprudence is deeply rooted in how the law can best serve the natural world, inspiring future lawyers with the kind of jurisprudence the natural world so urgently needs to exist. Maria Mercedes Sanchez, Former Coordinator of the United Nations Harmony with Nature Programme. Pelizzon coins the term ecological jurisprudence and mobilises it to create deep normative foundations for future environmental law developments. Any serious environmental scholar will have to engage with him because of the breadth and depth of what he achieves in this book. Professor Afshin Akhtar Khavari, QUT.

Public Relations and Neoliberalism Kristin Demetrious, 2022 Focusing on two of the most fraught and intractable public debates of the present time, human induced climate change and the human rights of refugees, asylum seekers, immigrants and the stateless, this book raises critical questions about the role and relationship of public relations in weakening democratic political systems. It shows a clear but often indirect link between PR and a neoliberal agenda that has been vastly underestimated and oversimplified as spin. This comes at a great cost for society. Public Relations and Neoliberalism provides

a panoramic view of public relations from the post war period when a powerful communication template propelled by the PR industry served the neoliberal agenda to create political diversion division and hegemony at the same time But today public relations is not just a tool of industry or government Rather it has become the default mode and style of being and relating in the world that seeps into and affects all areas of life professional corporate domestic political activist and technological And the metastasis of neoliberal meaning into so many realms has important ramifications for society and individuals Looking at the confluences and contradictions within the logic of public relations both as a practice and in terms of how it has been theorized and understood this book provides an important contribution to critical work in the communicative field Solving Complex Ocean Challenges Through Interdisciplinary Research: Advances from Early Career Marine Scientists Stephanie Brodie, Christopher Cvitanovic, Maria Grazia Pennino, Jon Lopez, André Frainer, Kelly Ortega-Cisneros, Natasa Maria Vaidianu, Samiya Ahmed Selim, Sabine Mathesius, 2022-06-01 The Topic Editors Stephanie Brodie Christopher Cvitanovic Maria Grazia Pennino Jon Lopez and Andr Frainer declare that they are members of the IMBeR Integrated Marine Biosphere Research network and IMECaN Interdisciplinary Marine Early Career Network and are collaborating with the IMBeR research community CEN® Exam Prep Study Guide Springer Publishing Company, 2023-03-16 CEN Exam Prep Study Guide gets right to the point with a targeted content based on the latest BCEN exam blueprint This easy to follow guide includes all the tools you need to prepare practice and pass the exam and nothing you don't PREPARE Concise coverage of the content you'll be tested on Quick reference features with complications alerts and nursing pearls Need to know information to prepare you for exam day PRACTICE Two full length practice tests one in book and one online to assess your readiness and simulate the test taking experience Detailed rationales for correct and incorrect answers Pop quizzes that highlight key information you don't want to miss PASS The first time with Springer Publishing Exam Prep's 100% Pass Guarantee With confidence knowing you're well prepared with all the skills and knowledge you need on exam day and in practice With pride in your commitment to patient health and safety CEN is a registered trademark of Board of Certification for Emergency Nursing BCEN BCEN does not sponsor or endorse this resource nor does it have a proprietary relationship with Springer Publishing **Biodiversity** R C Sobti, 2022-12-30 The term biodiversity or biological diversity describes the variety of living beings on Earth encompassing microorganisms plants animals and ecosystems such as coral reefs forests and deserts In fact it also represents a wealth of biological resources available to us Today instead of exploring and preserving its unmapped biodiversity mankind has gone away from mother nature conquering the domain through relentless exploitation This has resulted in an ecological imbalance and thereby has posed serious threat to biodiversity Declining biodiversity is therefore a concern for countless reasons Biodiversity's wealth of genetic information can be conserved by storing biological material from endangered species Cell lines gametes and embryos are preserved so that in case a species becomes extinct or there is a need to increase the population of the species then cloning and artificial reproductive

techniques can be used to revive and reproduce the said species The present volume discusses the biodiversity of specific animal groups such as cnidarians and fish as well as potential risks to and methods for conserving some of them The following important aspects are addressed 1 The importance of biodiversity in maintaining ecosystem balance for sustainability 2 The emerging role of biodiversity as a source of important materials pharmaceuticals food and so on as such or through genetic manipulation to meet the contemporary and future challenges 3 The impact of environment degradation on biodiversity and conservation in a changing environment 4 Conventional and emerging biotechnological techniques to conserve biodiversity The book is intended for academics scientists and naturalists working in the fields of biology biochemistry biophysics and biomedical sciences

Contemporary Security Studies Alan Collins, 2022 With unrivalled coverage of a wide range of issues from terrorism nuclear deterrence and the weapons trade to environmental security transnational crime and cyber security Contemporary Security Studies is the definitive cutting edge introduction to security studies Bringing together contributions from leading scholars it provides a student friendly guide to traditional and critical theoretical approaches as well as the most important contemporary issues that dominate the modern security field Whether you are exploring how politicians portrayed the Covid19 pandemic as a security issue or the role that popular culture plays in promoting peace a broad variety of real world case studies and examples throughout the text encourage you to question your preconceptions of security studies and to critically evaluate key approaches and ideas in the subject New to this Edition A new Chapter 13 on popular culture introduces you to this innovative approach to security studies exploring the role that it plays in shaping and understanding security related processes A revised Chapter 12 on securitization theory traces its emergence and evolution as a framework for analysis covering everything you need to know about its main concepts and criticisms Chapter 27 on transnational crime now includes coverage of the crime terror nexus the relationship between organized crime and the state and a case study focusing on Mexico Every chapter has been thoroughly updated to reflect current political issues and developments in world affairs such as the initial impact of the Covid 19 pandemic climate change and forced migration Book jacket

Policing Black Bodies Angela J. Hattery, Earl Smith, 2021-03-01 An essential work that advances an acute awareness of our responsibility to make society equitable for all Library Journal Starred Review In this provocative book the authors connect the regulation of African American people in many settings into a powerful narrative Completely updated throughout the book now includes a new chapter on policing black athletes bodies and expanded coverage of the Black Lives Matter movement policing trans bodies and policing Black women s bodies

Australia in the Anthropocene Erik Paul, 2023-01-01 The book is a study on planetary realism in a critical analysis of Australia in the age of the Anthropocene It contextualises Australia in the degradation of the biosphere deeply harmful to humanity s wellbeing accelerating the threat of nuclear war and the tensions of a declining democracy The Anthropocene is a critical period threatening the viability of the Australian nation state It involves the decarbonisation of the economy driven by

domestic and foreign corporate power and the geopolitics of world domination as a close ally of the US Australia s militarisation for war against China must be contested in the pursuit for a green and just new deal framed in the foreign policy of reconciliation with Asia including a fully cooperative entente with China *Change in Global Environmental Politics* Michael W. Manulak,2022-05-12 In a period of planetary crisis this book shows how large scale change occurs in global environmental politics **The Christian Science Monitor Index** ,1992
