Neo Five Factor Inventory Manual German:

Personality in Speech Tim Polzehl, 2014-08-30 This work combines interdisciplinary knowledge and experience from research fields of psychology linguistics audio processing machine learning and computer science The work systematically explores a novel research topic devoted to automated modeling of personality expression from speech For this aim it introduces a novel personality assessment questionnaire and presents the results of extensive labeling sessions to annotate the speech data with personality assessments It provides estimates of the Big 5 personality traits i e openness conscientiousness extroversion agreeableness and neuroticism Based on a database built on the questionnaire the book presents models to tell apart different personality types or classes from speech automatically *Company Success Among German Internet Start-ups: Social Media, Investors and Entrepreneurs' Personalities* Dominik P. Matyka, 2012 There has been a lot of research on factors that help to explain why some start ups become successful and their founders rich and on the other hand why other start ups fail terribly Of course starting up an enterprise is a complex activity dependent on institutional regulations competitors market developments and the simple recognition of the right opportunities at the right time We know all of this but still cannot accurately predict our chances of being successful as entrepreneur There are some methods venture capitalists use such as evaluating start up teams and studying business plans However even after doing this the chance of making a correct prediction is still lower than throwing a coin Research has never been able to explain much of this complexity but there are at least three factors that have repeatedly turned up when determining success and failure in the last few years The first of these factors is a result of our tremendous technological development in the past few decades but particularly in the most recent In nearly all young enterprises the utilization of social media and social networks has become a vital factor for survival and success Many research results over the last few years have yielded the conclusion that social media are by far the most important platform for marketing products and services To put this more scientifically the diffusion of innovation is increasingly interlinked with social media In addition the recognition and creation of opportunities also increasingly requires social media platforms However this does not mean one should operate only online investing all of his time and energy to communicating in social networks The second factor concerns something that is quite obvious money Since the vast majority of start ups do not have their own money or the ability to easily get a loan obtaining financial resources is often a major problem There are different ways to raise some money One can ask friends or family or seek investors **Semantics and Psychology of Spirituality** Heinz Streib, Ralph W. Hood, Jr., 2015-10-16 This book examines what people mean when they say they are spiritual It looks at the semantics of spirituality the visibility of reasons for spiritual preference in biographies in psychological dispositions in cultural differences between Germany and the US and in gender differences It also examines the kind of biographical consequences that are associated with spirituality The book reports the results of an online questionnaire filled out by 773 respondents in Germany and 1113 in the US personal interviews with a selected group of

more than 100 persons and an experiment Based on the data collected it reports results that are relevant for a number of scientific and practical disciplines It makes a contribution to the semantics of everyday religious language and to the cross cultural study of religion and to many related fields as well because spirituality is evaluated in relation to personality mysticism well being religious styles generativity attachment biography and atheism The book draws attention to the new and ever changing ways in which people give names to their ultimate concern and symbolize their experiences of transcendence

McCrae, Juri Allik, 2012-12-06 ROBERT R MCCRAE it is simply personality research conducted in different countries The implicit assumption behind this practice is that personality processes are universal and where they are studied is thus of no consequence An insensitivity to cultural context once imputed mostly to Americans now appears to characterize the field worldwide Fortunately recent years have also seen a rise of interest in studies of personality and culture Church 2001 Church Lee McCauley McCrae 2000 What do these new studies show Are personality processes indeed universal or are there significant variations across cultures that necessitate a more nuanced approach to research There is as yet no definitive answer to that question In some respects human personality does seem to transcend the boundaries of language and culture in other respects it is profoundly influenced by social and historical forces Sorting these issues out must be a priority for our field if we are to understand the current personality literature Measurement in Health Psychology Paola Gremigni, Antonio De Padua Serafim, Giulia Casu, Victor Zaia, 2022-06-15 Luxury Fashion Retail Management Tsan-Ming Choi, Bin Shen, 2016-11-26 Using various research methodologies such as reviews case studies analytical modeling and empirical studies this book investigates luxury fashion retail management and provides relevant
