Dave Reed, James McConnachie

Nepali Class 9 Guide:

Gender Trouble Makers Jennifer Rothchild, 2007-05-07 International development efforts aimed at improving girls' lives and education have been well intended somewhat effective but ultimately short sighted and incomplete This is because international development efforts often operate under a reductive understanding of the term gender and how it influences the lives of girls and boys Gender is more commonly conceived by international efforts as characteristics which are ascribed to girls as norms for behaviour In particular the analysis in Gender Trouble Makers focuses on the social constructions of gender and the ways in which gender was reinforced and maintained through a case study in rural Nepal In developing countries like Nepal promoting access to and participation in existing formal education programme is clearly necessary but it is not in itself sufficient to transform gender power relations in the broader society When gender is properly addressed as a process then all stakeholders involved researchers governmental officials and community members can begin to understand and devise more effective ways to increase both girl and boy students enrollment participation and success in school The Rough Guide to Nepal Dave Reed, James McConnachie, 2012-07-02 The Rough Guide to Nepal offers an insider's guide to Nepal from its Tantric temples to its lively bars It details all the finest Himalayan treks with practical up to date and expert advice on where to go when and what to take It covers all the National Parks offering advice and information on everything from tracking wildlife to hiring elephants Dedicated chapters are devoted to mountain biking white water rafting and other adventure sports and there is unrivaled detail on Buddhism Hinduism and the numerous ethnic groups that make Nepal a unique destination The Rough Guide to Nepal also contains scores of detailed maps covering everything from Pokhara and the Chitwan National Park to the Everest Base Camp trek Make the most of your time with The Rough Guide to Nepal Now available in PDF format **Primary School Student Achievement in Environmental Education** Badri D. Locating the Field Simon Coleman, Peter Collins, 2020-09-09 Are reports of the death of conventional fieldwork in anthropology greatly exaggerated This book takes a critical look at the latest developments and key issues in fieldwork The nature of locality itself is problematic for both research subjects and fieldworkers on the grounds that it must now be maintained and represented in relation to widening and fragmenting social frames and networks Such developments have raised questions concerning the nature of ethnographic presence and scales of comparison From the social space of a cybercafe to cities in India the UK and South Africa among others this book features a wide range of ethnographic studies that provide new ways of looking at the concepts of locality and site It shows that rather than taking key fieldwork processes such as globalization and mobility for granted anthropologists are well placed to examine and critique the totalizing assumptions behind these notions

A Guide to Gender and Classifiers Alexandra Y. Aikhenvald, 2025-02-12 This book explores the range of noun categorization devices found in the languages of the world from the extensive systems of numeral classifiers in Southeast Asia to the highly grammaticalized gender agreement classes in Indo European languages Almost all languages use some type of noun categorization device in their grammar with the most widespread being linguistic gender whereby nouns are classified based on core semantic properties such as sex animacy humanness or shape and size Numeral classifiers are also common and classify a noun in terms of its inherent nature animacy shape and form accompanied by a numeral or a quantifier Other types of noun categorization devices include noun classifiers possessive classifiers verbal classifiers and a number of rarer types such as locative and deictic classifiers In this volume Alexandra Aikhenvald investigates all facets of these nominal categorization systems from their form and distribution to their origins development and loss Noun categorization devices provide unique insights into how people categorize the world through the language in one language a human might be classified in terms of orientation hence as vertical in another as male or female and in
