topics and answers them by taking full advantage of Mathematica's latest features. For example: What sources of energy does the world really use? Are our cities getting warmer? Is the novel *El Quixote* written in Pi? Is it possible to reliably date the Earth using radioactive isotopes? How can we find planets outside our solar system? How can we model epidemics, earthquakes, and other natural phenomena? What is the best way to compare organisms genetically? This new edition introduces the new capabilities added to the latest version of Mathematica version 13 and discusses new topics related to machine learning, big data, finance, economics, and physics. New to the Second Edition: Separate sections containing carefully selected additional resources that can be accessed from either Mathematica or online. Online Supplementary materials including code snippets used in the book and additional examples. Updated commands to take full advantage of Mathematica 13.
