Robert M Kaplan :

More than Medicine Robert M. Kaplan, 2019-02-04 American science produces the best medical treatments in the world Yet U S citizens lag behind in life expectancy and quality of life Robert Kaplan marshals extensive data to make the case that U S health care priorities are sorely misplaced invested in attacking disease not in solving social problems that engender disease in the first place

Disease, Diagnoses, and Dollars Robert M. Kaplan, 2009-04-21 Disease Diagnoses and Dollars is about the costs of health care and their impact on health The U S health care system is the largest sector in the biggest economy and the US spends significantly more per capita on health care than any other country yet it ranks last among comparison nations on the major health indicators Within the U S there is evidence that regions that spend more do not have better outcomes and some evidence suggests that quality of care is lower in the regions that spend more not less on health care Robert Kaplan takes the controversial position that mass markets have been created for services that may offer little or no benefit to patients Many of these markets are for preventive medicine making healthy people a market for expensive pharmaceutical products and tests These include cancer screening tests and medications to control blood pressure cholesterol and glucose Kaplan forcefully argues that the overuse of medications and tests runs up the costs of health care As more employers drop health insurance for their employees when costs accelerate the expanded use of ineffective preventive medicine may have the unintended consequence of increasing the number of uninsured patients potentially damaging the health of others in the community The concluding chapters of Disease Diagnoses and Dollars offer suggestions for policy makers and for patients Methods for systematically evaluating the cost effectiveness of new guidelines are discussed The final chapter provides practical suggestions to enable patients to share in decisions about treatments or tests that can have uncertain benefits

Psychological Testing Robert M. Kaplan, 2017-01-11

More Than Medicine Robert Malcolm Kaplan, 2019 American science produces the best and most expensive medical treatments in the world Yet U S citizens lag behind their global peers in life expectancy and quality of life Robert Kaplan brings together extensive data to make the case that health care priorities in the United States are sorely misplaced America's medical system is invested in attacking disease but not in addressing the social behavioral and environmental problems that engender disease in the first place Medicine is important but many Americans act as though it were all important The U S stakes much of its health funding on the promise of high tech diagnostics and miracle treatments while ignoring strong evidence that many of the most significant pathways to health are nonmedical Americans spend millions on drugs to treat high cholesterol for example which increase life expectancy by six to eight months on average But they underfund education which might extend life expectancy by as much as twelve years Wars on infectious disease have paid off but clinical trials for chronic conditions costing billions rarely confirm that new treatments extend life By comparison the National Institutes of Health spends just 3 percent of its budget on research in social and behavioral determinants of health even though these factors account for 50 percent of premature

deaths America's failure to take prevention seriously costs lives More than Medicine argues that we need a shake up in how we invest resources and it offers a bold new vision for longer healthier living **Biomedical Index to PHS-supported Research**, 1993 **California. Benedict, 2017-04-25 This book supports the emerging field of vascularized composite allotransplantation VCA for face and upper limb transplants by providing a revised ethically appropriate consent model which takes into account what is actually required of facial and upper extremity transplant recipients In place of consent as permission giving waiver or autonomous authorization the standard approaches this book imagines consent as an ongoing mutual commitment i e as covenant consent The covenant consent model highlights the need for a durable personal relationship between the patient subject and the care provider researcher Such a relationship is crucial given the recovery period of 5 years or more for VCA recipients The case for covenant consent is made by first examining the field of vascularized composite allotransplantation the history and present understandings of consent in health care and the history and use of the covenant concept from its origins through its applications to health care ethics today This book explains how standard approaches to consent are inadequate in light of the particular features of facial and upper limb transplantation In contrast use of the covenant concept creates a consent model that is more appropriate ethically for these very complex surgeries and long term recoveries Biomedical Index to PHS-supported Research: Project number listing, investigator listing ,1989 **NCVA** George P.
