Negotiating Hostage Crises With The New Terrorists:

Negotiating Hostage Crises with the New Terrorists Adam Dolnik, Keith M. Fitzgerald, 2008 Illuminates the role of negotiation in resolving terrorist barricade hostage crises If one assumes that negotiation is only about bargaining making deals or concessions then of course we should not negotiate with terrorists as this action is likely to ultimately lead to some rewards for their bad behavior However if one understands that negotiation ultimately is the use of communication to exercise influence in order to change someone's thinking behavior and decision making the

Negotiating Hostage Crises with the New Terrorists Adam Dolnik, Keith M. Fitzgerald, 2007-11-30 This book is about the role of negotiation in resolving terrorist barricade hostage crises What lessons can be learned from past deadly incidents so that crisis negotiators and decision makers can act with greater effectiveness in the future What are the lessons the terrorists are learning and how will they affect the dynamics of future incidents What can we learn about the terrorist threat and about preventing the escalation of future terrorist hostage taking situations While there are many trained crisis negotiators around the world almost none of them has ever had contact with a terrorist hostage taking incident Further the entire training program of most hostage negotiators focuses on resolving crises that do not take into consideration issues such as ideology religion or the differing sets of strategic objectives and mindsets of ideological hostage takers This is especially true with regard to the terrorists of the new breed who have become less discriminate more lethal and more willing to execute hostages and die during the incident Further many of the paradigms and presumptions upon which the contemporary practice of crisis negotiation is based do not reflect the reality of the new terrorists The main focus of this book is on the detailed reconstruction and analysis of the two most high profile cases in recent years the Moscow theater and the Beslan school hostage crises with a clear purpose of drawing lessons for hostage negotiation strategies in the future This is an issue of top priority Terrorist manuals from countries such as Saudi Arabia and Iraq reveal that terrorist organizations are very closely observing and analyzing the lessons learned from these two incidents suggesting that we are likely to see this type of new terrorist hostage taking involving large numbers of suicide fighters and executions of hostages at some point in the future This raises a wide array of questions about appropriate responses and negotiation strategies From the first glance it is clear that we are not prepared

Negotiating with Terrorists Guy Olivier Faure, I. William Zartman, 2010-02-25 This edited volume addresses the important issue of negotiating with terrorists and offers recommendations for best practice and processes Hostage negotiation is the process of trying to align two often completely polarised parties Authorities view hostage taking as unacceptable demands made by unacceptable means However terrorists view their actions as completely justified even on moral and religious grounds If they are to try and reconcile these two sides it is essential for hostage negotiators to understand terrorist culture the hostage takers profiles their personality their view of the world and also the authorities their values and their framing of the problem raised by the taking of hostages Although not advocating

negotiating with terrorists the volume seeks to analyse when why and how it is done Part I deals with the theory and quantifiable data produced from analysis of hostage situations while Part II explores several high profile case studies and the lessons that can be learnt from them This volume will be of great interest to students of terrorism studies conflict management negotiation security studies and IR in general I William Zartman is the Jacob Blaustein Distinguished Professor Emeritus of International Organization and Conflict Resolution and former Director of the Conflict Management and African Studies Programs at the Paul H Nitze School of Advanced International Studies Johns Hopkins University Washington DC He is a member of the Steering Committee of the Processes of International Negotiation PIN Program at the International Institute of Applied Systems Analysis IIASA in Laxenburg Austria He is author editor of over 20 books on negotiation conflict and mediation Guy Olivier Faure is Professor of Sociology at the Sorbonne University Paris I and a member of the Steering Committee of the Processes of International Negotiation PIN Program at the International Institute of Applied Systems Analysis IIASA in Laxenburg Austria He has served as an advisor to French government on hostage negotiations

Countering New(est) Terrorism Bruce Oliver Newsome, James W. Stewart, 2017-12-15 How should we analyze and assess new terrorist behaviors What are the particular risks and challenges from new terrorism Should we negotiate with terrorists and if so how When should we use force against terrorists Countering New est Terrorism Hostage Taking Kidnapping and Active Violence Assessing Negotiating and Assaulting improves our knowledge of new terrorist behaviors and our skills in responding to such attacks The term new terrorism has been in circulation since the late 90 s This book analyzes the newest terrorism that has emerged in recent years characterized by increased hostage taking kidnapping and active violence and develops best practices for countering these emerging threats Along the way it challenges fashionable wishful thinking that all terrorists are open to rational negotiation or de radicalization that military responses always reflect badly on the official side and that terrorists are not constrained by their own doctrines The new terrorists are dramatically more ideological murderous and suicidal They are generally less reconcilable less trusting of official negotiators less likely to release detainees and more likely to kill detainees They are less likely to demand ransoms yet more likely to release hostages in cases in which they do demand ransom They are more informed about the official side s policies tactics techniques and procedures They are more likely to use new information and communication technologies against responding agencies and officials They are more capable fighters they kill more people despite deploying fewer fighters per hostage Most disturbing is the fact that they take advantage of free er societies to access easier targets Features Includes evidence based definitions and descriptions of political religious Jihadi and new terrorism Presents the first large n comparison of old and new terrorism using an original extension of the Global Terrorism Database GTD with added codes for each of 10 735 hostage crises and more than 500 000 data points from 1970 through 2016 Details a further extension of the GTD covering all terrorist events from 2004 through 2016 roughly 5 million data points Offers prescriptive advice and visual decision trees on how to
