Communication Protocols and Standards Dawoud Shenouda Dawoud,Peter Dawoud,2022-09-01 Data communication standards are comprised of two components The protocol and Signal data port specifications for the devices involved The protocol describes the format of the message and the meaning of each part of the message To connect any device to the bus an external device must be used as an interface which will put the message in a form which fulfills all the electrical specifications of the port These specifications are called the Standard The most famous such serial communication standard is the RS 232 In IT technology Communication can be serial or parallel Serial communication is used for transmitting data over long distances It is much cheaper to run the single core cable needed for serial communication over a long distance than the multicore cables that would be needed for parallel communication It is the same in wireless communication Serial communication needs one channel while parallel needs multichannel Serial Communication can also be classified in many other ways for example synchronous and asynchronous it can also be classified as simplex duplex and half duplex Because of the wide spread of serial communication from home automation to sensor and controller networks there is a need for a very large number of serial communication standards and protocols These have been developed over recent decades and range from the simple to the highly complicated This large number of protocols was necessary to guarantee the optimum performance for the targeted applications It is important for communication engineers to have enough knowledge to match the right protocol and standard with the right application The main aim of this book is to provide the reader with that

knowledge The book also provides the reader with detailed information about Serial Communication Universal Asynchronous Receiver Transmitter UART Universal Synchronous Asynchronous Receiver Transmitter USART Serial Peripheral Interface SPI eSPI Universal Serial Bus USB Wi Fi WiMax Insteon The details of each technology including specification operation security related matters and many other topics are covered The book allocates three chapters to the main communication standards These chapters cover everything related to the most famous standard RS 232 and all its variants Other protocols such as I2C CAN ZigBee Z Wave Bluetooth and others are the subject of the authors separate book Microcontroller and Smart Home Networks

Advanced Computer and Communication Engineering Technology Hamzah Asyrani Sulaiman, Mohd Azlishah Othman, Mohd Fairuz Iskandar Othman, Yahaya Abd Rahim, Naim Che Pee, 2015-12-28 This book covers diverse aspects of advanced computer and communication engineering focusing specifically on industrial and manufacturing theory and applications of electronics communications computing and information technology Experts in research industry and academia present the latest developments in technology describe applications involving cutting edge communication and computer systems and explore likely future trends In addition a wealth of new algorithms that assist in solving computer and communication engineering problems are presented The book is based on presentations given at ICOCOE 2015 the 2nd International Conference on Communication and Computer Engineering It will appeal to a wide range of professionals in the field including telecommunication engineers computer engineers and scientists researchers academics and students
