Jung's Alchemical Philosophy Stanton Marlan, 2022-04-27. Winner of the IAJS Book Award 2023 for Best Theoretical Book. Traditionally, alchemy has been understood as a precursor to the science of chemistry, but from the vantage point of the human spirit, it is also a discipline that illuminates the human soul. This book explores the goal of alchemy from Jungian psychological and philosophical perspectives. Jung's *Alchemical Philosophy: Psyche and the Mercurial Play of Image and Idea* is a reflection on Jung's alchemical work and the importance of philosophy as a way of understanding alchemy and its contributions to Jung's psychology. By engaging these disciplines, Marlan opens new vistas on alchemy and the circular and ouroboric play of images and ideas, shedding light on the alchemical opus and the transformative processes of Jungian psychology. Divides in the history of alchemy and in the alchemical imagination are addressed as Marlan deepens the process by turning to a number of interpretations that illuminate both the enigma of the Philosopher's Stone and the ferment in the Jungian tradition. This book will be of interest to Jungian analysts and those who wish to explore the intersection of philosophy and psychology as it relates to alchemy.

Jung's Technique of Active Imagination and Desoille's Directed Waking Dream Method Laner Cassar, 2020-06-07. Jung's *Technique of Active Imagination* and Desoille's *Directed Waking Dream Method* brings together Carl Jung's active imagination and Robert Desoille's *veille dirigée* (directed waking dream method). It studies the historical development of these approaches in Central Europe in the first half of the 20th century and explores their theoretical similarities and differences, proposing an integrated framework of clinical practice. The book aims to study the wider European context of the 1900s which influenced the development of both Jung's and Desoille's methods. This work compares the spatial metaphors of interiority used by both Jung and Desoille to describe the traditional

concept of inner psychic space in the waking dreams of Jung's active imagination and Desoille's RED. It also attempts a broader theoretical comparison between the procedural aspects of both RED and active imagination by identifying commonalities and divergences between the two approaches. This book is a unique contribution to analytical psychology and will be of great interest for academics, researchers and post graduate students interested in the use of imagination and mental imagery in analysis, psychotherapy and counselling. The book's historical focus will be of particular relevance to Jungian and Desoillian scholars since it is the first of its kind to trace the connections between the two schools and it gives a detailed account of Desoille's early life and his first written works. This book was a Grady Award nominee for 2021.

Jungian and Interdisciplinary Interfaces Between Emotions Elizabeth Brodersen, Isabelle Meier, Valeria Céspedes Musso, 2025-04-09. C. G. Jung stressed that emotions are the driving forces behind social and psychological lives, enabling individuals to connect with themselves and their environment. Divided into five parts, this innovative volume explores the enmeshments between emotions. The material locates emotions within the context of nonverbal, developmental, somatic, embodiment, eco-political and psychosocial engagement, gender and LGBTQ. Shadow, phenomenology, history, myth and the effects of war are likewise explored in depth. Each theme expertly stimulates a resurgence of Jungian and non-Jungian clinical and academic interest in the role that emotions play in contemporary thought and in the impetus for eco-socioeconomic change. This volume will be of great interest to Jungian analysts and trainees, psychotherapists and interdisciplinary cultural theorists. It will aid scholars in Jungian academic studies and related fields interested in metaphor, symbols, gender and LGBTQ perspectives. *Anima and Africa* Matthew A. Fike, 2017-05-23.
