Theoretical Issues in Reading Comprehension Rand J. Spiro, Bertram C. Bruce, William F. Brewer, 2017-11-03. Research in cognitive psychology linguistics and artificial intelligence the three disciplines that have the most direct application to an understanding of the mental processes in reading is presented in this multilevel work originally published in 1980 that attempts to provide a systematic and scientific basis for understanding and building a comprehensive theory of

reading comprehension The major focus is on understanding the processes involved in the comprehension of written text Underlying most of the contributions is the assumption that skilled reading comprehension requires a coordination of text with context in a way that goes far beyond simply chaining together the meanings of a string of decoded words The topics discussed are divided into five general areas Global Issues Text Structure Language Knowledge of the World and Inference Effects of Prior Language Experience and Comprehension Strategies and Facilitators and represent a broad base of methodology and data that should be of interest not only to those concerned with the reading process but also to basic science researchers in psychology linguistics artificial intelligence and related disciplines *School-Home Links Reading Kit, Kindergarten Activities* ,2000 *Handbook of Demonstrations and Activities in the Teaching of Psychology* Mark E. Ware,David E. Johnson,2013-11-26 For those who teach students in psychology education and the social sciences the *Handbook of Demonstrations and Activities in the Teaching of Psychology* Second Edition provides practical applications and rich sources of ideas Revised to include a wealth of new material 56% of the articles are new these invaluable reference books contain the collective experience of teachers who have successfully dealt with students difficulty in mastering important concepts about human behavior Each volume features a table that lists the articles and identifies the primary and secondary courses in which readers can use each demonstration Additionally the subject index facilitates retrieval of articles according to topical headings and the appendix notes the source as it originally appeared in *Teaching of Psychology* the official journal of the Society for the Teaching of Psychology Division Two of the American Psychological Association Volume I consists of 97 articles about strategies for teaching introductory psychology statistics research methods and the history of psychology classes Divided into four sections one for each specialty the book suggests ways to stimulate interest promote participation grasp psychological terminology and master necessary scientific skills **Teaching** ,1926 *Read! Read! Read!* Laurie Glass,Beth Pike,Linda Peist,2000-05-09 This book outlines a program to address a need among educators to involve parents in the process of helping their children learn to read and write Although the at risk reader is provided with supplemental support at school additional reinforcement is needed from home to maximize children s learning potential While much has been written about how parents should read aloud to their children this book goes beyond other publications by supplying the educator with a structured program that trains parents to implement a variety of techniques The authors encourage parents to truly participate in their children s literacy development armed with a knowledge of the reading process and aware of their invaluable role The chapters contain a framework of concrete information that will guide educators in the most successful way to involve and train parents Included are background knowledge and tools that professionals will need to run their own series of parent workshops Specific workshop agendas and all supporting information are presented in a manner easily adaptable for the specific needs of various education situations This book can be used by primary educators special education teachers reading specialists Reading Recovery tm leaders and teachers
