Building the Skyline Jason M. Barr,2016

The Manhattan skyline is one of the great wonders of the modern world But how and why did it form Much has been written about the city s architecture and its general history but little work has explored the economic forces that created the skyline This book chronicles the economic history of the Manhattan skyline In the process the book debunks some widely held misconceptions about the city s history Part I lays out the historical and environmental background that established Manhattan s real estate trajectory before the Skyscraper Revolution at the end of the 19th century The book begins with Manhattan s natural and geological history and then moves on to how it influenced early land use and neighborhood formation and how these early decisions eventually impacted the location of skyscrapers Part II focuses specifically on the economic history of skyscrapers and the skyline investigating the reasons for their heights frequencies locations and shapes The book discusses why skyscrapers emerged downtown and why they appeared three miles to the north in midtown but not in between Contrary to popular belief it was not due to the depths of Manhattan s bedrock nor the presence of Grand Central Station Rather midtown s emergence was a response to the economic and demographic forces that were taking place north of 14th Street after the Civil War The book also presents the first rigorous investigation of the causes of the building boom during the Roaring Twenties Contrary to conventional wisdom the boom was largely a rational response to the economic growth of the nation and city The last chapter investigates the value of Manhattan Island and the relationship between skyscrapers and land prices Finally an Epilogue offers policy recommendations for a resilient and robust future skyline

Regulation and Governance of Mutual Funds Mohammed Khair Alshaleel,2022-08-12

This book provides a detailed analysis of mutual fund regulations and governance in the UK from the investor protection perspective It comprehensively describes mutual funds by their function social utility and legal attributes examining the level of protection provided to retail investors under existing regulations Mutual funds are externally managed with fund ownership separated out from their management which carries a potential conflict of interest between the self interests of the fund management and each fund s investors The book provides an in depth analysis of this agency problem in the mutual fund industry comparing the competing governance models in the UK and the US and the supervision of management activities In the UK it investigates the main governance

mechanisms including disclosure the effectiveness of voting rights and the role of the Financial Conduct Authority in protecting investors It also considers the role of prudential regulations in protecting mutual fund investors with a particular focus on risk management and mutual fund liquidity crisis The book further investigates the impact of the withdrawal of the UK from the European Union Brexit on the industry and what this means for the future of the undertakings for collective investment in transferable securities UCITS in the UK The concept of mutual funds is still not clearly understood so this book will clearly define the different legal and practical aspects of mutual funds It will be the first substantial study of mutual fund governance mechanisms under the existing mutual fund laws and regulations in the UK

The Evolution of Great World Cities Christopher Kennedy, 2011-01-01 Some cities seem destined to become major financial capitals yet never do Seville for instance was the centre of Spain's opulent New World Empire but failed to become a financial metropolis Others like former colonial backwater Hong Kong defy the odds by growing into major trading centres What are the key factors distinguishing those cities that become wealthy from those that don't Christopher Kennedy illuminates how geography technology and especially the infrastructure of urban economies allow cities to develop and thrive The Evolution of Great World Cities unfolds through the tales of several urban centres including Venice Amsterdam London and New York City at key junctures in their histories Kennedy weaves together significant insights from urbanists such as Jane Jacobs and economists such as John Maynard Keynes drawing striking parallels between the functioning of ecosystems and of wealthy capitals The Evolution of Great World Cities offers an accessible introduction to urban economies that will change the way you think about cities

,1959 **Real Estate Fundamentals** Carl Gunther,1995 The Problematic Structure of Management of Co-Owned Properties in Turkish Law and Pursuance of Solutions Eylem Apaydin,2011-01-18 This book provides a critical evaluation of the statutory framework for co ownership regulations in Turkish law and it acquaints Turkish jurists with the existence of trust of land in English law It is posited upon the argument that solutions to the problems observed in the administration and enjoyment of co owned properties in Turkish law may be overcome by the introduction of a new institution which is inspired by the trust mechanism in English law This renders the existing Turkish regulation for the management of the co owned properties outdated unreasonably complex and extremely artificial with some assumptions After successfully establishing that the Turkish system is currently inadequate to provide an efficient system this book provides the indications for a solution Being aware of the limitations of the Turkish legal system and the restricted possibility of the direct reception of trust this book examines to what extent the current institutions in Turkish law would replace the functions of trust in the context of co ownership This examination results in searching for a new system as it is concluded that any of the trust like devices in the current Turkish law could not effectively and comprehensively serve the purposes that the English trust does Therefore this book suggests that a new mechanism inspired by the English trust of land would provide the required mechanisms for an efficient managerial system for co owned properties Rather than asserting to solely focus on a comprehensive new system this book discusses the possible solutions and urges further research about the matter Hence the so called alien system trust of land and its capability to provide an alternative but efficient and productive solution to the managerial problems of the co owned properties would be made familiar with the Turkish jurists **Books in Print Supplement** ,2002 **Theory and Applications of Models of Computation** Mitsunori Ogiwara,Jun Tarui,2011-04-27 This book constitutes the refereed proceedings of the 8th International Conference on Theory and Applications of Models of Computation TAMC 2011 held in Tokyo Japan in May 2011 The 51 revised full papers presented together with the abstracts of 2 invited talks were carefully reviewed and selected from 136 submissions The papers address the three main themes of the conference which were computability complexity and algorithms and are organized in topical sections on general algorithms approximation graph algorithms complexity optimization circuit complexity data structures logic and formal language theory games and learning theory and cryptography and communication complexity *The Publishers Weekly* ,1959
