Realidades 2 Pg 14:

Realidades y retos de las políticas alimentarias y de la sostenibilidad en un mundo global en aceleración: estudios de caso, Bien puede decirse que nos encontramos en la actualidad en un momento de aceleración histórica con considerables cambios y transformaciones geopolíticas y también sociales. Afecta a todos los ámbitos aunque sin duda uno de los fundamentales es la alimentación. Su importancia es esencial de ello no cabe duda aunque cada vez más se hace necesario que sea una cuestión que se encuentre situada en lo más alto de la agenda internacional. La seguridad alimentaria, el derecho a la alimentación y la soberanía alimentaria son los conceptos que intentan hacerlo posible. No obstante no son suficientes y se incluyen otros más de máxima necesidad como el de sistemas alimentarios sostenibles y el de transiciones alimentarias. El cambio climático y la aplicación de la sostenibilidad lo van requiriendo ya que no olvidemos más del treinta por ciento de las emisiones causantes de aquel provienen de la forma actual de producción de alimentos. Estas transiciones son una necesidad perentoria. **Mitos y realidades en salud-enfermedad** Alejandro Ramos Escobedo, 2014-04-28. Algunos problemas de salud no son causados por bacterias o microbios sino por actitudes, costumbres o hábitos fundamentados en mitos, es decir en ideas y creencias culturales que no tienen un sustento científico. En el presente trabajo existe un interés primordial por explorar y describir el papel especulativo que ciertos mitos desempeñan en relación con algunos problemas de la sociedad y las incompatibilidades entre cultura y naturaleza. Ciertos mitos relacionados con aspectos de salud, enfermedad, salud emocional y condiciones de la vida común son el resultado de la desinformación y el desconocimiento que la falta de oportunidades educativas e informativas genera. Pero muchos mitos se disipan cuando la persona enfrenta determinadas experiencias y accede a la información indicada y veraz. Esta idea más el hecho de advertir la ausencia de materiales que aborden los mitos en relación con la salud, enfermedad y dirigidos a un público no especializado influyeron en la realización de esta obra en la que se analizan los mitos y las realidades sobre diabetes, trastornos mentales, accidentes en niños, divorcio y sexualidad. Analecta Gregoriana, 1964.

Innovación docente en la universidad y realidades emergentes M. M. Fernández Martínez, A. Luque de la Rosa, J. J. Carrión Martínez, I. M. Román Sánchez, 2020-11-01. Es una realidad que la innovación docente emerge cada vez más como una supracategoría dentro del campo de la enseñanza universitaria. Son múltiples los vectores y elementos que configuran ese constructo que nos anuncia cambio, modificación o novedad. Se trata de un cambio intencional conducido en un escenario multiaxial en donde el docente universitario se mueve entre múltiples disciplinas científicas con locus más o menos debatidos dentro de la enseñanza universitaria. De otra parte nos encontramos con una importantísima renovación de los marcos conceptuales de carácter metodológico tanto en un sentido estricto como y técnicas específicas variadas acuden a insertarse en la tarea cotidiana del docente universitario como en un sentido más abierto, enfoques de competencias, modelos dialógicos, diversidad, inclusión, género, etc. Así nos encontramos con cambios curriculares de gran calado como el Espacio Europeo de Educación Superior junto a diversas y abundantes irrupciones de metodologías específicas, unas importadas desde ámbitos de

enseanza diferentes a la universidad y otras generadas en el propio contexto universitario En esta obra nos planteamos ofrecer al lector interesado por la acción docente en la universidad una serie de aportaciones que todas ellas mantienen un denominador común la de presentar respuestas a realidades emergentes afrontadas desde una concepción innovadora de la acción docente Se abordan nuevas realidades vinculadas al tradicional campo de las TIC acercamientos al tema de las competencias de la diversidad e inclusión ciudadana sin dejar de prestar atención a aspectos transversales como la colaboración docente la formación permanente o el desarrollo de situaciones de estrés en el docente Los autores constituyen un elenco de docentes universitarios disciplinarmente variado trabajo social educación economía arquitectura médica etc por lo que su nexo de intereses en común es la innovación docente en un escenario universal como es la universidad pero desde experiencias singulares

As diferenças no nível de escolaridade por gênero por raça e etnia e por status socioeconômico ficaram de fora mas a um nível mais agregado aponta-se componentes-chave da produtividade nacional e portanto da renda nacional que contribuem para a relevância da pesquisa. Todas estas quantidades evoluem com o tempo portanto outro conjunto de questões virão a ser somadas. A escolaridade em conclusão representa duas facetas de tudo isso: documentar essas quantidades e compreendê-las fica mais fácil para não parecer tão apologetico. *Novos corpos, novas realidades* Aída R.
