Trudi Strain Trueit,2006 **Gunpowder** Clive Ponting,2005 The formula for gunpowder was discovered in China in 800 AD Known as fire drug its origin was the alchemists search for an immortality elixir and it was initially a medicine not an explosive but the Chinese went on to develop every type of weapon that ever used gunpowder incendiaries bombs rockets cannon and hand held guns as well as fireworks For 400 years the Chinese kept gunpowder to themselves until a Mongol soldier leaked the secret to the Islamic world The Ottoman empire was built on gunpowder after the spectacular capture of Constantinople using new siege tactics while the Moghuls conquered India with muskets and artillery mounted on 700 carts held together with ox harnesses The use of gunpowder in Europe was inhibited by a shortage of saltpetre but archers soon gave way to gunners while gunpowder destroyed the last vestiges of feudalism and changed the balance of power in the medieval world *Gunpowder* Chris Oxlade,2011-08-01 Each title in this series looks at one life changing invention and traces its history from conception prototypes and revisions to the modern day The series covers the technological and scientific curriculum content but also the historical context the current and future impact of invention upon society and more

Gunpowder Charles River,2021-05-07 Includes pictures Includes a bibliography for further reading What gunpowder did for war the printing press has done for the mind Wendell Phillips The crucial importance of education in China a prized virtue instilled in the population among all classes by beloved teacher and philosopher Confucius in the 6th century BCE generated an unprecedented and long lived golden age of literature and art It also gave rise to a cornucopia of transformative innovations and groundbreaking technology particularly following the dawn of the Common Era In addition to the wheelbarrow the seismograph the waterwheel deep drilling suspension bridges and ship rudders among countless other life changing contraptions the Chinese developed what were later dubbed the Four Great Inventions of China One of those was none other than gunpowder which was developed no later than the 9th century and was being used for military purposes by

the 11th century Its use slowly spread through South Asia and the Middle East before making it to Europe in the late 13th century For a time it was a mere curiosity but its destructive power and military potential would be realized quickly The first record of a cannon in Europe comes from a manuscript written in 1326 which has an illustration showing an armored man with what looks like a slow match lighting a vase shaped object This crude cannon was called a pot de fer in French and vasi in Italian While medieval engineers developed new types of cannons and explosives capable of destroying walls and castles others were making the first handguns possible European sources first mentioned the widespread use of handgonnes as they were often called in the late 14th century precisely the time when gunpowder became cheaper These were short metal barrels stuck on the end of wooden hafts that could be tucked under the arm the powder being lit through a touchhole with the free hand While they were not terribly accurate and had a shorter range and slower rate of fire than longbows or crossbows they had the advantage of being better able to punch through armor than longbows and crossbows and they were simple to make and use By the late 15th century handgonners had become a major part of the leading armies and weapons that relied on gunpowder would remain a staple of warfare throughout the 19th century paying deadly homage to one of history s most important inventions Gunpowder The History and Legacy of the Explosive that Modernized Warfare examines the origins of the chemical explosive and its long winding history across the world Along with pictures depicting important people places and events you will learn about gunpowder like never before **Gunpowder** Jack Kelly, 2005 When Chinese alchemists fashioned the first man made explosion during the tenth century no one could have foreseen its full revolutionary potential Invented to frighten evil spirits rather than fuel guns or bombs the simple mixture of saltpetre sulphur and charcoal became one of humanity s most critical inventions As word of its explosive properties spread from Asia to Europe it paved the way for Western exploration hastened the end of feudalism and the rise of the nation state and greased the wheels of the Industrial Revolution
