Political Economy for Human Rights Manuel Couret Branco,2019-06-05 Over time there has been a miscommunication between mainstream economics and human rights that has paved the way to a justificatory ideology that validates the submission of human rights to the logic of market capitalism This book shows how the discourse of mainstream economics is intrinsically opposed to the strengthening of human rights and outlines the principles upon which a human rights based political economy can be built Considering a variety of recognized human rights such as the right to water and sanitation the right to social security the right to work cultural freedom and democracy this book describes how mainstream economics theory conflicts with these rights and explores alternative modes of thinking that incorporate human rights concerns into economics Moreover the book also reflects on the teaching of political economy for human rights It sets out that a political economy favourable to human rights must be pluralist interdisciplinary participatory de commodified non utilitarian and non consequentialist The author proposes that it must not only assume the performative character of economics but also and especially its transformative purpose

Political Economy for Human Rights will offer students academics activists and policy makers useful tools to understand some of the main contradictions of contemporary societies and new paths leading to a more just and fraternal world It will also be of great

interest to the general public concerned with human rights and economic issues **Resources in Education** ,1987

Manfred Binder, Martin Jänicke, Ulrich Petschow, 2013-03-09 Starting from this dematerialization hypothesis for the first time comparative case studies analyse in detail the driving forces of industrial restructuring of different industries and countries in Europe where such a decline has been observed at least temporarily The Monetary Imagination of Edgar Allan Poe

Heinz Tschachler, 2013-06-05 In this first of its kind treatment Heinz Tschachler offers an account of Edgar Allan Poe's relation to the world of banking and money in antebellum America. He contends that Poe gave the full force of his censure to the acrimonious debates about America's money: Andrew Jackson's bank war, the panic of 1837, and the ensuing depression and the nation's inability to furnish a sound and uniform currency. Poe's attitude is overt in his early satires, more subdued in *The Gold Bug* and almost an undercurrent in writings that enter into and historicize the discovery of gold in California. In Poe's writings much is concealed though his art also reveals while it conceals: in this instance a deep-felt desire for an authority that would guarantee a measure of permanence and continuity to the nation's currency. That kind of currency was finally furnished by Abraham Lincoln: both were born in 1809, Poe died in 1849, at one time a dedicated reader of Poe's tales and sketches. Wielding his power of regulation, Lincoln came to save the Union not just militarily but also economically. Under him the United States government finally provided the kind of sound and uniform currency that Poe in his writings could only name and rehearse **Current Research in Britain** ,1995 **Media, Identity, and Struggle in Twenty-First-Century**

China Rachel Murphy, Vanessa L. Fong, 2013-09-13 How are different groups of people such as sex workers, migrant workers, rural cadres and homosexuals represented in China's media? How accurately do representations created by the media reflect the lived experiences of Chinese people? Do Chinese people accept the representations and messages disseminated by the media? Can they use the media to portray their own interests? How are media practices in China changing? Have new technologies and increased access to international media opened up new spaces for struggle in China? The essays in this volume address these questions by using a combination of ethnography and textual analysis and by exploring representation in and usage of a range of media including instant messaging, the internet, television, films, magazines and newspapers. The essays highlight the richness, diversity and sometimes contradictory tendencies of the meanings and consequences of media representations in China. The volume cautions against approaches that take the representations created by the media in China at face value and against oversimplified assumptions about the motivations and agency of players in the

complex struggles that occur between the media the Chinese state and Chinese citizens

The Global Development Crisis Benjamin Selwyn, 2014-02-07 The central paradox of the contemporary world is the simultaneous presence of wealth on an unprecedented scale and mass poverty Liberal theory explains the relationship between capitalism and poverty as one based around the dichotomy of inclusion into capitalism vs exclusion from capitalism Within this discourse the global capitalist system is portrayed as a sphere of economic dynamism and as a source of developmental opportunities for less developed countries and their populations Development policy should therefore seek to integrate the poor into the global capitalist system The *Global Development Crisis* challenges this way of thinking Through an interrogation of some of the most important political economists of the last two centuries Friedrich List Karl Marx Leon Trotsky Joseph Schumpeter Alexander Gerschenkron Karl Polanyi and Amarta Sen Selwyn argues that class relations are the central cause of poverty and inequality within and between countries In contrast to much development thinking which portrays the poor as reliant upon benign assistance this book advocates the concept of labour centred development Here the poor are the global labouring classes and their own collective actions and struggles constitute the basis of an alternative form of non elitist bottom up human development
