**The Sacred Is the Profane** William Arnal, Russell T. McCutcheon, 2013 The Sacred Is the Profane collects nine essays written over several years by William Arnal and Russell T McCutcheon that share a convergent perspective not simply that both the category and concept religion is a construct something that we cannot assume to be natural or universal but also that the ability to think

and act religiously is quite specifically a modern political category in its origins and effects the mere by product of the modern state These collected essays substantially rewritten for this volume advance current scholarly debates on secularism debates which the authors argue insufficiently theorize the sacred secular church state and private public binaries by presupposing religion often under the guise of such terms as religiosity faith or spirituality to historically precede the nation state The essays return again and again to the question of what religion word and concept accomplishes now for those who employ it whether at the popular political or scholarly level The focus here for two writers from seemingly different fields is on the efficacy costs and the tactical work carried out by dividing the world between religious and political church and state sacred and profane
