50 Years Of Technical Education In Singapore: How To Build A World Class Tvet System Natarajan

Varaprasad,2016-03-23 This book describes in vivid detail how a newly independent nation with neither a history of technical education nor industry developed in a short period of time a world class system of technical and vocational education that helped it make rapid progress in its manufacturing and industrial sector The economy and the education sector both developed in parallel with each complementing the other utilizing strategies and making the decisions that were to bring the country quickly to advanced status Studies show that premature investment in higher education at the expense of technical and vocational education has created many leaders but few doers leading to high unemployment The Singapore Technical Vocational Education and Training TVET story demonstrates how governmental support helped changed the image of technical and vocational education to one equal with higher education yet including bridges and ladders to allow everyone to maximize their potential The Bihar Information ,1966 Bulletin of the International Railway Congress Association

Ng'ethe,George Subotzky,George Afeti,2008-01-01 This title explores an area of tertiary education that is currently understudied this is the extent and nature of differentiation and articulation in African tertiary education systems The overall finding is that the binary system is dominant characterised by universities and polytechnics as distinct types of institutions Differentiation is clearly evident in Africa However though varied in nature and extent the differentiation is mostly horizontal as opposed to vertical Articulation on the other hand seems to be in its infancy as some universities in their admission requirements d The Electrical Engineer ,1911 BLS Report ,1953 **Labor Law and Practice in the Republic of**
