The book is the result of a nationwide survey in the UK that measured public use of and attitudes to the past, archaeology, and collecting. The author reviews this research in the light of contemporary theory on ideology and representation and goes on to develop a convincing explanation for the failure of museums and similar institutions to connect with the majority of the public. Merriman marshals the empirical and theoretical work to make a powerful case for a new approach to attract the under-served populations, one which encourages a view of the museum as a service helping its public to see, understand, and engage with its own personal, local, and multi-faceted past.

This text looks at human-animal interactions, especially some of the less well-known aspects of the field. A number of studies in the book document some of the vast changes humankind has wrought upon the natural environment through the movement of various species of animals around the world. These chapters provide contributions to the understanding of contemporary ecological problems, especially the deforestation taking place to provide grazing for live stock. The 31 contributions offer a shop window of approaches, primarily from a biological perspective.
