

CHAPTER 3

Portland cement concrete

3.1 Introduction

Concrete refers to a collection of composite materials consisting of binders and particles, where particles are bound together by the binders. There are many types of concrete, which mainly depend on the type of binders, such as Portland cement concrete, asphalt concrete, and polymer concrete. Portland cement concrete is the most widely used construction material. In this chapter, the term concrete refers to Portland cement concrete unless stated otherwise.

Compared with other building materials, concrete is general and universal concrete, in particular, is called broadly treated with its elements. It is made from various types of sand and water, and contains coarse and fine aggregate and gravel, sand and gravel, cement, admixtures, and so on. It is a composite material with various properties and characteristics, such as high strength, high durability, fire resistance, and so on. It is a general and universal material, which is widely used in construction.

Concrete is a composite material, which is the most widely used construction material. It is a composite material, which is widely used in construction.

3.1.1 Versatility

- ① It is used for most of the construction materials, such as building, dam, bridge, road, machine foundation, water supply system.
- ② It is used for the largest water use in the world, such as the Three Gorges Dam.
- ③ It is used for most of the different purposes, such as road building, the foundation, the water supply system, the water supply system.

3.1.2 Durability

- ① The concrete is a composite material, which is the most widely used construction material.
