

POSTMODERNISM AND THE ENVIRONMENTAL CRISIS

Environmental awareness has undoubtedly grown over the last two decades, but the actual achievements of ecological movements have been paltry. In order to explain, and to overcome, this paradoxical situation, *Postmodernism and the Environmental Crisis* examines the philosophical traditions underlying the current approaches to the ecological crisis. It is the first book to combine advanced cultural theory and environmental philosophy; the result is a radically new vision – a postmodern ‘grand narrative’.

At the heart of the problem, Arran E. Gare argues, is the failure of mainstream, Marxist and postmodern approaches alike to theorize the links between the ecological crisis, the globalization of capitalism and the fragmentation and disintegration of modernist culture. A successful ecological politics needs to forge a new world-view out of the post-modernist critique of Western civilization and a global ecological perspective. *Postmodernism and the Environmental Crisis* shows that this can be done and, in doing so, lays the foundations for an effective environmental movement.

This book will be vital reading for advanced students of environmental studies as well as for environmental philosophers and for all those interested in cultural and political theory.

Arran E. Gare is Senior Lecturer in Philosophy and Cultural Inquiry at Swinburne University, Australia. He is the author of *Nihilism Incorporated* and *Beyond European Civilization*.

FutureNatural George Robertson, 1996 We are living in an age when nature seems to be on the brink of extinction yet at the same time nature is becoming increasingly ubiquitous and unstable as a category for representation and debate FutureNatural brings together leading theorists of culture and science to discuss the concept of nature its past present and future Contributors discuss the impact on our daily life of recent developments on biotechnologies electronic media and ecological politics Increasingly scientific theories and models have been taken up as cultural metaphors that have material effects in transforming ways of seeing and structures of feeling The book addresses the issue of whether political and cultural debates about the body and environment can take place without reference to nature or the natural This collection considers how we might think a future developing from emergent scientific theories and discourses What cultural forms may be produced when new knowledges challenge and undermine traditional ways of conceiving the natural

The Solar Economy Hermann Scheer, 2013-06-17 The global economy and our way of life are based on the exploitation of fossil fuels which not only threaten massive environmental and social disruption through global warming but at present rates of

consumption will run out within decades causing huge industrial dislocation and economic collapse Even before then the conflicts it causes in the Middle East and elsewhere will be frighteningly exacerbated The alternative exists renewable energy from renewable sources above all solar Substituting renewable for fossil resources will take a new industrial revolution to avert the worst of the damage and establish a new international order It can be done and it can be done in time The Solar Economy by one of the world's most effective analysts and advocates lays out the blueprints showing how the political economic and technological challenges can be met using indigenous renewable and universally available resources and the enormous opportunities and benefits that will flow from doing so

The Natural and the Artefactual Keekok Lee, 1999-01-01 In this book philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism that if we could reduce or eliminate pollution we could save the planet without unduly disrupting our modern industrialized societies Lee argues instead that the process of modernization with its attendant emphasis on technological innovation has fundamentally transformed nature into just another manmade artefact Ultimately what needs to be determined is if nature has value above and beyond human considerations whether aesthetic spiritual or biological This provocative book attempts to reconfigure environmental ethics positing the existence of two separate ontological categories the natural and the artefactual Natural entities be they organisms or inert matter are morally considerable because they possess the ontological value of

independence whereas artefacts are created by humans expressly to serve their own interests and ends

Postpolitics and the Limits of Nature Andy Scerri, 2019-01-01 Explores why past generations of radical ecological and social justice scholarship have been ineffective and considers the work of a new wave of scholarship that aims to reinvent the radical project and combat injustice In *Postpolitics and the Limits of Nature* Andy Scerri offers a comprehensive overview of the critical theory project from the 1960s to the present refracted through the lens of US politics and the American Left He examines why past generations of radical ecological and social justice scholarship have been ineffective in the fight against injustice and rampant environmental exploitation Scerri then engages a new wave of radicals and reformists who in the wake of the Occupy movement and the 2016 presidential election are reinventing the radical project as a challenge to injustice in the Anthropocene era Along the way he provides a fresh account of the thought of one of the major contributors to critical theory Theodor Adorno and of recent work that seeks to link Adorno's ideas to the so called new realism in political philosophy and political theory This book is something like an histoire v nementielle of contending philosophies of nature and the natural in relation to economy and politics over the past 60 odd years What is impressive is the way Scerri situates the many different activists scholars and views in the transition from Keynesian regulatory society to naturalized neoliberalism Thus authors are treated not as timeless purveyors of theory but rather as political economists rooted in the trends and currents of their particular time I believe this will be an important book Ronnie D Lipschutz coauthor of *Environmental Politics for a Changing World Power Perspectives and Practice* Second Edition
