

#### STARTING A WARM ENGINE

- Move ON/STOP switch to the ON position.
- Pull the choke off/idle lever out to the full extent. Then, push the lever back in completely (to the OFF/CHOKE position). This will set the fast idle back to the start position.
- Pull the starter rope quickly with your right hand until the engine starts.
- Squeeze and release the throttle trigger to allow engine to return to idle speed.

#### DIFFICULT STARTING (or starting a flooded engine)

The engine may be flooded if it has not started after 10 pulls.

Flooded engine can be cleared of excess fuel by following the warm engine starting procedure listed above. Move the ON/STOP switch to the ON position.

Choking conditions may vary quite depending on how badly unit is flooded. If engine still fails to start, refer to TROUBLESHOOTING TABLE or call 1-800-534-8723.

#### CHAIN BRAKE

**WARNING:** If the brake band is worn too thin it may break when the chain brake is triggered. With attention bracketed, the chain brake will not stop the chain. The chain brake should be replaced by an authorized service dealer if any part is worn below .003" thick. Replace on a chain brake should be made by an authorized service dealer. Take your unit to the place of purchase if purchased from a working dealer, or to the nearest authorized master service dealer.

- This saw is equipped with a chain brake. The brake is designed to stop the chain if kickback occurs.
- The inertia-activated chain brake is activated if the front hand guard is pushed forward, either manually (by hand) or automatically (by machine movement).
- If the brake is already activated, it is disengaged by pulling the front hand guard back toward the front handle as far as possible.

- When cutting with the saw, the chain brake must be disengaged.

#### Braking function control

**CAUTION:** The chain brake must be checked several times daily. The engine must be running when performing this procedure. This is the only instance when the saw should be placed on the ground with the engine running.

Place the saw on firm ground. Grip the rear handle with your right hand and the front handle with your left hand. Apply full throttle by fully depressing the throttle trigger. Activate the chain brake by turning your left wrist against the hand guard without releasing your grip around the front handle. The chain should stop immediately.

#### Inertia-activated function control

**WARNING:** When performing the following procedure, the engine must be turned off.

Grip the rear handle with your right hand and the front handle with your left hand. Hold the chain saw approximately 14" (35 cm) above a stump or other wooden surface. Release your grip on the front handle and use the weight of the saw to let the tip of the guide bar fall forward and contact the stump. When the tip of the bar hits the stump, the brake should activate.

## CUTTING METHODS

#### IMPORTANT POINTS

- Check chain tension before first use and after 1 minute of operation. See CHAIN TENSION in the ASSEMBLY section.
- Cut wood only. Do not cut metal, plastic, masonry, non-wood building materials, etc.
- Stop the saw if the chain sticks on a foreign object. Inspect the saw and repair or replace parts as necessary.
- Keep the chain out of oil and sand. Even a small amount of dirt will quickly dull a chain and thus increase the possibility of kickback.
- Practice cutting a few small logs using the following techniques to get the feel of using your saw before you begin a major sawing operation.
  - Squeeze the throttle trigger and allow the engine to reach full speed before cutting.
  - Begin cutting with the saw frame against the log.
  - Keep the engine at full speed the entire time you are cutting.
