Daniel Ashton, 1980 **Village Chicken Production Systems in Rural Africa** Aichi J. Kitalyi, Food and Agriculture Organization of the United Nations, 1998-01-01 The poultry production systems of Africa are mainly based on the scavenging indigenous chickens found in virtually all villages and households in rural Africa. These systems are characterized by low output per bird. Nevertheless, over 70 percent of the poultry products and 20 percent of animal protein intake in most African countries come from this sector. Therefore, increased rural poultry production would result in a positive impact on household food security, both in increased dietary intake and in income generation. This study coincided with the World Food Summit held at FAO Rome from 13 to 17 November 1996, where delegations committed their governments and civil society to a global attack on food insecurity and poverty. Poultry, like other

short cycle animal stock is viewed by the FAO Special Programme for Food Security SPFS as a crucial element in the struggle for sustained food production and poverty alleviation The guidelines provided in this study are particularly pertinent to those countries participating in the SPFS where village chicken production will have a substantial impact on increased household food security and gender equity Foreword **Indigenous Chicken Production and Marketing Systems in Ethiopia** Fisseha Moges,2010-01-01 **U.S. Naval Training Bulletin** ,1949 Naval Training Bulletin ,1946
