Saving Capitalism From The Capitalists World Capitalism And Global History:

Saving Capitalism from the Capitalists Hartmut Elsenhans, 2014-10-15 Achieving societal prosperity by understanding the concept of Capitalism Corporations, Accounting, Securities Laws, and the Extinction of Capitalism Wm. Dennis Huber, 2022-07-18 Ever since Marx the future of capitalism has been fiercely debated Marx and his followers predicted capitalism will end by violent overthrow while others prophesied its demise will be the result of collapsing under its own weight Still others argue that capitalism will not only continue to exist but continue to expand globally This book takes a distinctively different approach by presenting solid evidence that capitalism has already ended The author argues that corporate statutory law securities laws and generally accepted accounting principles have combined to cause the extinction of capitalists Without capitalists as owners of capital there can be no capitalism The book examines the factors that converged to contribute to and hasten the extinction of capitalists and thus of capitalism as an economic system in an ironic case of the law of unintended consequences The very things that were intended to promote protect and sustain capitalism are the things that caused its death It exposes the fallacy that capitalism as an economic system not only continues to exist but is expanding globally Capitalism is extinct and the social system constructed on capitalism as an economic system cannot be sustained This book will appeal to economists accountants historians political scientists lawyers and sociologists as well as students of those disciplines *The Future of the Gulf Region* Arno Tausch, 2021-08-09 This book studies values and attitudes in the Gulf region In light of global power shifts the threatening collapse of internal security in the West and uncertainty about the current leadership vacuum in world society this book explores a future leading role of the Gulf countries in such institutions as the G 20 and the OECD Based on rigorous analysis of macro level data and opinion surveys with relevance for the Gulf region it analyzes the global macro factors shaping the Gulf s future at a time of the global COVID 19 crisis and depression and rising global tensions Starting with an empirical time series analysis of the long cycles of global politics and economics it highlights the implications for the Gulf region Offering a multivariate analysis of civil society values in the Gulf the author analyzes value changes and attitudes on antisemitism political Islam internal security democracy and other issues of Arab politics The partially optimistic conclusions of the study testify to the underestimated and incipient maturity of the Gulf s civil society and strongly suggest that the Gulf s future is rather with the free societies of the West and not with a Neo Ottoman Empire in whatever form Exceptional in scope and right up to the minute in coverage Brian M Pollins Associate Professor Emeritus The Ohio State University An outstanding and topical book by an astute scholar of the MENA region Professor Hussein Solomon Academic Head of Department Political Studies and Governance University of the Free State South Africa The most comprehensive and insightful study on the subject to date Manfred B Steger Professor of Sociology University of Hawai i at Manoa and Global Professorial Fellow Western Sydney University **The Political Economy of Extractivism** Hannes Warnecke-Berger, Jan Ickler, 2023-07-21 For many countries primarily in the Global South

extractivism the exploiting and exporting of natural resources is big business For those exporting countries natural resource rents create hope and promise for development which can be a seductive force This book explores the depth of extractivism in economies around the world The contributions to this book investigate the connection between the political economy of extractivism and its impact on the sociopolitical fabric of natural resource exporting societies in Asia Africa Latin America and Eastern Europe The book engages with a comparative perspective on the persistence of extractivism in these four different world regions The book focuses on the formative power of rents and argues that rents are seductive The individual contributions flesh out this seductive force of rents on different political scales and how this seduction affects a variety of actors The book investigates how these actors react to the prevalence of rent how they align or break with specific political and economic strategies and how myths of resource driven development play out on the ground The book therefore underlines that rent theory bridges current debates in different area communities and offers fresh insights into extractivist societies social economic and political dynamics This book will be of significant interest to readers in political economy political science development studies and area studies

Not Paying the Rent Neil Wilcock, Edgar Federzoni dos Santos, 2021-09-20 This is a conversational book with chapters directly followed by responses from experts The main authors propose that the failure in development is not due to capitalism but rather rentism which is earnings based on political rather market returns Rent prevents development and ingrains social and economic inequalities Using the case study of Brazil's economic development it is shown how development fails because policies Brazil and other low to middle income countries promote do not overcome the main obstacle to development rent The overcoming of rent would occur within a model of globalisation whereby the advanced economies still prosper concurrently as the poorest countries grow all underpinned by international organisations defending a rule based globalisation Not Paying the Rent Imagining a Fairer Capitalism presents a new application of the theory of rent both historically in the case of Brazil and in practical terms in tackling it through modern international organisations It will be relevant to students researchers and general readers interested in inequality and development economics

Changing World SETA,2019-09-01 Since the end of the Cold War the world system has been going through a comprehensive transformation With the collapse of the Soviet Union the United States has remained the only superpower in the world which began to behave as the only hegemon and accordingly pursued unilateral policies towards other international actors The U S considers most global developments and international institutions established by the U S as detrimental for the continuation of its global hegemony therefore it started to undermine international norms principles and rules The U S faces difficulties in maintaining order at both global and regional levels Eventually other global powers and regional actors began to follow different if not conflictual policy orientations and to play their own games As a regional actor who wants to play a global role similar to other global actors Turkey has been undertaking foreign policy initiatives under the AK Party government over the past two decades However there are too many global challenges as well as regional crises for Turkey to overcome One such instance being that Turkey was forced to redefine its relations with its Western allies More importantly the U S has decided to redefine its relations with all of its partners including Turkey Therefore one of the first challenges for Turkey to overcome is the resistance against the American otherization Russia and China have created alternatives to international institutions established with the American initiative and invite other countries to be a part of these alternative institutions Turkey also at least tactically chose to be a part of some of these platforms a move which is not welcomed by Western countries On the other hand there are many regional crises such as the Palestinian Israeli conflict the Syrian crisis and the state failures in the Middle East which have significant implications for the domestic and foreign policy of Turkey Turkey has recently begun to establish different institutions and initiated different processes in order to be able to undertake international responsibilities Besides traditional actors new institutions such as the Yunus Emre Institute YEE established in 2007 the Disaster and Emergency Management Authority AFAD established in 2009 and the Presidency for Turks Abroad and Related Communities YTB established in 2010 had also restructured institutions such as the Turkish Crescent Turkish Cooperation and Coordination Agency T KA established in 1992 and the Diyanet Foundation TDV established in 1975 emerged as influential actors of Turkey s soft power in its foreign policy implementation Eventually Turkey became one of the leading countries in the world for providing developmental and humanitarian aid to the less developed countries After years of high growth rates and rapid economic development Turkey had reclaimed more of its independence within its foreign policy and began to act as a more autonomous actor Throughout the long term political

stability of the AK Party government Turkey redefined its bilateral relations with both global and regional players As a member of some significant international platforms such as the NATO and the G20 Turkey positioned itself into a new global role and attempted to develop an alternative inclusive political discourse Today Turkey is taken into consideration within the global balance of power calculations as a regional power and as a game changing actor This new issue of Insight Turkey highlights some of the various regional developments around Turkey and discuss various movements of new actors and instruments crises and progresses from economy to culture and how Turkey responds to these ever changing regional dilemmas This issue aims to enlighten readers about ongoing current events with three commentaries five articles and five off topic pieces devoted to discussing these issues more in depth As observed by careful voyeurs of the changing international system Turkey positions itself advantageously as a pillar of strength with a global voice to be heard Burhanettin Duran invites us into the discussion with a masterplan of President Erdogan s foreign diplomacy and how a new chapter has emerged to further a practical humanitarian focused but militarily strong Turkey through the various international challenges it continues to face Faruk Kaymakc enlightens us on how the European Parliamentary Elections were avidly followed by the Turkish public who are eagerly hoping that this could be the beginning of much needed repairs for European Turkish relations The challenge of attaining EU membership being one of the ongoing unresolved topics was particularly focused upon with the hope that European political changes can mean positive change for Turkey Meanwhile Muharrem K l highlights that it is not just Europe with ongoing political changes as Turkey itself has made a complete overhaul on their judicial system Capturing a snapshot of a large judicial reform package highlights a shift to modernize and update the judicial progress of Turkey to one compatible with domestic and international affairs This move had won praise from all parties within Turkey and the result of which sees a legal aligning closer to Europe Also calling for change but within the economic realm would be Mehmet Bulut and Cem Korkut who bring us back to how old Ottoman cash waqfs foundations can provide modern solutions for the difficult financial times the world faces Bringing back an alternative to capitalism and reintroducing an older system that had worked for over 500 years cash waqfs provide protection to the individual ensuring equilibrium between the state system and the individual This protection thus served better for humanity with its poverty reduction and partnership models helped pioneer the microcredit mechanism the world has ever started to rely on Federico Donelli focuses on a relatively new dimension of Turkish foreign policy and reminisces on how foreign policy is rather a cultural affair National branding and the use of culture as a diplomatic tool are seen as successful outlets of an emerging soft power Turkey being a modern example of broadcasting its image globally utilizing its own high culture and pop culture to try to shift its international position despite external circumstances trying to paint another picture As an example of a sub governmental actor in Turkish foreign policy Erman Ak ll and Beng elenk emphasize the increasing effectiveness of T KA and highlight that foreign aid can be a fine example of a nation branding tool Turkey outstretching itself into the global realm

allows us to examine T KA as one of the largest successes that revitalizes the spirit of pre war Turkey creating a peace belt diplomatically among many diverse nations Advocating truthfulness global power and generosity T KA is bustling with positive bilateral relations proving an international success of Turkey s charitable image Abdurrahman Babacan focuses on the consolidation of democracy in Turkey during the AK Party period and takes us on a journey into the core of AK Party political maneuvers especially within its first two election periods Detailing the ebbs and flows of democracy building in a world where priorities need to be met from the internal minorities its military factor and to the external expectations of the EU Thus ushering Turkey into a new positive course and pushing human rights to the forefront while modernizing the legal system despite various domestic setbacks from terrorist groups ISIS PKK and FET all within the same time span There is no doubt the importance energy has played amongst Turkey s highest priorities these days and Remziye Y lmaz Bozku explores this importance among Turkey s relationship with the Black Sea Energy Cooperation BSEC Its framework stretching beyond energy into various political sectors has made for a diverse agenda of difficult decision making Though being the most active negotiator amongst its regional partners Turkey lends hope that the BSEC can be a stability factor within this region of former rivals despite numerous limitations and economical shortcomings the organization faces One of the two off topic commentaries focusing on regional actors Mohammed Nuruzzaman showcases a new regional challenger in the case of Saudi Arabia Creating a new type of foreign policy aggressive and proactive in response to a growing Iran contrasts the pro democratic leanings of the region Critiquing what is called the Salman Doctrine for its lack of success in diplomacy and military affairs due mainly to its lack of strategy While Saudi Arabia intends to diversify away from its reliance on oil and modernize through a grand strategy regional stability will be the price that pays for it In the other off topic commentary Shamkhal Abilov and Beyrak Hajiyevev bring us to Azerbaijan and the importance neutrality can really play when in the middle of diverse great powers and how Azerbaijan neutrality can actually be an advantage for the EU What threatens this balanced policy is the U S withdrawal in the region and the power vacuum that will persist in the region Whether Azerbaijan is able to protect itself and remain neutral is a hard hitting speculation offered The remaining three articles focus on various issues in international politics H Sonmez Atesoglu develops a model calling attention as to how vital economic power is for international security and where that power comes from initially The recipe for building international security goes in depth about the interplay of economics trade maximizing military power population and technical capabilities From the Black Sea region a success story brings us to Radka Havlova and Zbyn k Dubsk who take us to Ukraine to discuss strategic culture and conflict resolution and how instrumental the OSCE was for de escalating the East Ukrainian conflict Resolving a lot of the nuances that anarchical international systems often create lead to a collaborative strategic culture of nations lead by commonality inclusivity and interconnected security Alper akmak and M Ali Sevgi conclude our journal with a holistic Muslim migration analysis touching upon the importance of language and the ongoing struggle for identity among four Turkish

migrants who had gone to Germany for varying reasons Following them with an anthropological approach to discover the inner depth of hardship and experience that goes into being an outlander We are confident that this issue of Insight Turkey entitled as Turkey in a Changing World Responses to Domestic and Regional Dynamics will provide timely analyses about Turkey's new instruments and actors of foreign policy and about different issue areas of international politics **The**

Poorer Nations: A Possible History of the Global South Vijay Prashad, 2013-03-12 A truly global history that examines the prospects of a worldwide power shift from North to South In *The Darker Nations* Vijay Prashad provided an intellectual history of the Third World and traced the rise and fall of the Non Aligned Movement With *The Poorer Nations* Prashad takes up the story where he left off Since the 70s the countries of the Global South have struggled to build political movements Prashad analyzes the failures of neoliberalism as well as the rise of the BRICS countries the World Social Forum issuebased movements like Via Campesina the Latin American revolutionary revival in short efforts to create alternatives to the neoliberal project advanced militarily by the US and its allies and economically by the IMF the World Bank the WTO and other instruments of the powerful Just as *The Darker Nations* asserted that the Third World was a project not a place *The Poorer Nations* sees the Global South as a term that properly refers not to geographical space but to a concatenation of protests against neoliberalism In his foreword to the book former Secretary General of the United Nations Boutros Boutros Ghali writes that Prashad has helped open the vista on complex events that preceded today's global situation and standoff *The Poorer Nations* looks to the future while revising our sense of the past *The World is Curved* David M. Mishkin, 2009-10-08 Many prominent critics regard the international financial system as the dark side of globalization threatening disadvantaged nations near and far But in *The Next Great Globalization* eminent economist Frederic Mishkin argues the opposite that financial globalization today is essential for poor nations to become rich Mishkin argues that an effectively managed financial globalization promises benefits on the scale of the hugely successful trade and information globalizations of the nineteenth and twentieth centuries This financial revolution can lift developing nations out of squalor and increase the wealth and stability of emerging and industrialized nations alike By presenting an unprecedented picture of the potential benefits of financial globalization and by showing in clear and hard headed terms how these gains can be realized Mishkin provides a hopeful vision of the next phase of globalization Mishkin draws on historical examples to caution that mismanagement of financial globalization often

aided and abetted by rich elites can wreak havoc in developing countries but he uses these examples to demonstrate how better policies can help poor nations to open up their economies to the benefits of global investment According to Mishkin the international community must provide incentives for developing countries to establish effective property rights banking regulations accounting practices and corporate governance the institutions necessary to attract and manage global investment And the West must be a partner in integrating the financial systems of rich and poor countries to the benefit of both The Next Great Globalization makes the case that finance will be a driving force in the twenty first century economy and demonstrates how this force can and should be shaped to the benefit of all especially the disadvantaged nations most in need of growth and prosperity

The Global Financial Crisis and Its Aftermath A.G. Malliaris, Leslie Shaw, Hersh Shefrin, 2016-09-06 In The Global Financial Crisis contributors argue that the complexity of the Global Financial Crisis challenges researchers to offer more comprehensive explanations by extending the scope and range of their traditional investigations To achieve this the volume views the financial crisis simultaneously through three different lenses economic psychological and social values Contributors offer a constructive methodology suitable for exploring financial crises They recognize how current economic analysis did not prepare academic economists business economists traders and regulators to anticipate economic and financial crises So they search more extensively within the broader discipline of economics for ideas related to crises but neglected perhaps because they were not mathematically rigorous They affirm that the complexity of financial crises necessitates complementary research Thus to put the focal purpose of this book differently they explore the Global Financial Crisis from three interconnected frameworks the standards of orthodox economic analysis Minskyan economics and the role of ideas and values in economics Values are the subject of both philosophy and psychology and can contribute to a better understanding of the Global Financial Crisis Values in general have been relatively neglected by economists This is not because there is doubt about their significance but rather because welfare economics and collective choice still operate within the neoclassical paradigm This volume argues that analyzing the value implications requires moving from the neoclassical framework to something that is broader and multidisciplinary
