Application of Visual Data in K-16 Science Classrooms Kevin D. Finson, Jon Pedersen, 2015-03-01 This book examines visual data use with students PK 16 as well as in pre service in service science teacher preparation Each chapter includes discussion about the current state of the art with respect to science classroom application and utilization of the particular visual data targeted by the author s discussion and explanation about the targeted visual data as applied by the author in his her classroom use of visual data as a diagnostic tool its use as an assessment tool and discussion of implications for science teaching and or science teacher preparation Although the body of research and practice in this field is growing there remains a gap in the literature about clearly explicating the use of visual data in the science classroom A growing body of literature discusses what visual data are although this topic is still viewed as being at the beginning of its development in educators thinking and there are some scattered examples of studies exploring the use of visual data in science classrooms although those studies have not necessarily clearly identified their foci as visual data per se As interest and attention has become more focused on visual data a logical progression of questioning has been how visual data are actually applied in the science classroom whether it be early elementary college or somewhere in between Visual data applications of interest to the science education community include how it is identified how it can be used with students and how students can generate it themselves how it can be employed as a diagnostic tool in concept development and how it can be utilized as an assessment tool This book explores that as well as a variety of pragmatic ways to help science educators more effectively utilize visual data and representations in their instruction

Building Networks for Critical and Altruistic Science Education John Lawrence Bencze, 2025-05-22 This edited volume provides theory based accounts often with practical examples of how educators from various jurisdictions in elementary secondary and tertiary formal education contexts as well as community based situations have helped students critically evaluate the relationships among science technology STEM society and the environment The goal is to develop and implement personal and sociopolitical actions to address concerns Collectively the perspectives and examples in the chapters form an expanding Foucauldian dispositif countering hegemonic mechanisms that favor a few elites at the expense of the wellbeing of most other living and nonliving things Many accounts draw on the STEPWISE project illustrating how a biotic and symbolic actants have been progressively assembled to promote more critical and altruistic citizenship

Competency-based Assessment Kate Lafferty, Melissa Barnes, 2024-11-18 This book is a practical evidence based guide for educators at all levels on how to assess and promote student learning broadening teachers understanding of assessment

Balancing assessment with the development and promotion of student learning can be a significant challenge for teachers. This book provides the content as well as practical guidance to support educators in developing their understanding of assessment from task driven domain bound content knowledge towards the assessment of complex competencies. Supported by research but not overwhelmed by it, the book provides practical strategies that can be applied in the classroom. The pedagogical structure of the book encourages self guided learning with each chapter providing opportunities for reflection to facilitate planning and goal setting as well as quotes and vignettes from students and teachers highlighting their experiences of and perspectives on assessment. This book is a great resource for practising educators and postgraduate students who want to improve their understanding of assessment, implement it more effectively and support better outcomes for their students.

Resources for Teaching Middle School Science Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-03-30. With age appropriate inquiry centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved, and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section

features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents
