Unit 3: Types of Functions

Lesson 1: Four Types of Functions: Linear, Absolute, Exponential, and Quadratic

Standard: F-IF.3 Compare key features of two functions using different representations (by comparing properties of two different functions, each with a different representation (symbolically, graphically, numerically in tables, or by verbal descriptions).

Vocabulary: Function, Equation, Linear, Quadratic, Absolute, Exponential, Graph, Table.

Goal: To be able to determine the type of function from a graph, table, or equation.

Lesson 2: Comparing Parts of the Four Functions: Linear, Absolute, Exponential, and Quadratic

Standard: F-IF.4 Interpreting features of graphs, tables, and verbal descriptions in context to describe functions that arise in applications relating two quantities for discrete periods and discontinuities.

F-IF.3 Compare the end behavior of functions using their rates of change over intervals of the same length to show that a quantity decreasing exponentially eventually exceeds a quantity increasing as a polynomial function.

Vocabulary: Domain, Range, Y-Intercept, Zero, X-Intercept, End Behavior, Increasing, Decreasing.

Goal: To determine parts of the four functions from a graph, table, or equation. To compare the parts, i.e. which has the greater intercept, which is increasing faster, larger values when evaluated for a specified x -value.

Lesson 3: Rates of Change

Standard: F-IF.7 Analyze functions (absolute values, polynomials, exponential, rational, and trigonometric functions (like and unlike) using different representations to show key features of the graph, by hand in simple cases and using technology for more complicated cases, including domain and range; intervals indicating where the function is increasing, decreasing, positive, or negative; rate of change; relative maximum and minimum; asymptotes and behavior (period) and discontinuities.

Vocabulary: Slope, Average Rate of Change, Interval

Goal: To determine the average rate of change over an interval. Compare two functions to determine which has a greater rate of change.

Gunzenhauser, 2012-03-08 A winner of the 2012 Critics Choice Book Award of the American Educational Studies Association AESA *The Active Ethical Professional* proposes an ethical framework for educators and school leaders who find their practice constrained by the demands of policies and structures created in response to accountability legislation The framework is derived from Michel Foucault s theories of discipline surveillance resistance and care of the self Gunzenhauser asserts that an educator s dual position of being normalized especially in relations with those above them in the education hierarchy and normalizing especially in relations with their students can be troubling and difficult The book argues that this position requires educators to be both ethical and active To be ethical educators not only need to resolve ethical dilemmas in defensible ways but they also need to recognize themselves as powerful in relation to others To be active educators need to

be vigilant for moments when they are placed in the position to be reactive to normalizing pressures and they also need to develop clear notions of how they may create opportunities for the cultivation of educational selves that are rich ethically aesthetically epistemologically and politically

Handbook of Research on New Media Literacy at the K-12 Level: Issues and Challenges Tan Wee Hin,

Leo, Subramaniam, R., 2009-05-31 Provides comprehensive articles on significant issues, methods and theories currently combining the studies of technology and literacy *Leading Technology-Rich Schools* Barbara B. Levin, Lynne Schrum, 2015-04-25 This timely book shows how award winning secondary schools and districts are successfully using technology and making systemic changes to increase student engagement, improve achievement and reinvigorate the teaching and learning process. Through in-depth case studies we see how experienced school and district leaders use technology in curricular, administrative and analytical ways to meet the needs of 21st century learners, educators and communities. These cases reveal important details addressed by the leadership of these schools and districts that go beyond what they did with technology to include changes in school culture, curriculum and teaching, uses of assessment data, financial considerations, infrastructure and involvement with the community. Book Features: Successful models from schools/districts experienced with using technology as a lever for school improvement; Case studies from diverse schools/districts across the country that show what works and how it works; A cross case analysis that makes it easy to compare individual schools and identify common practices. Barbara B. Levin is a Professor in the Department of Teacher Education and Higher Education and Director of the Teachers Academy at the University of North Carolina at Greensboro. Lynne Schrum is Dean, College of Education and Human Services, West Virginia University. Barbara B. Levin and Lynne Schrum offer their readers the distinct advantage of compressing into a single volume what it took me decades to learn. They not only present the big ideas of effective school leadership but bring them alive through case studies that illustrate how those ideas manifest themselves in leaders' day-to-day behaviors. I encourage you to use the ideas and practices you find here to leverage technology to create schools in which all students and adults thrive. From the Foreword by Dennis Sparks, Emeritus Executive Director, National Staff Development Council. Learning Forward. Prepublication Reviews. In *Leading Technology Rich Schools*, the authors present a fascinating and exciting set of case studies that provide great insight into the ways leaders can support high-level innovation in schools. Importantly, their focus is on technology that enhances learning and teaching rather than technology as an expensive school ornament. A must read for those who study and practice educational leadership. Jeffrey S. Brooks, Associate Professor and Educational Leadership Program Coordinator, School of Education, Iowa State University, author of *Black School White School: Racism and Educational Misleadership*. This book is a precious gift for the vast majority of administrators who desperately need concrete examples of how to create, facilitate and sustain technology-infused learning environments. Scott McLeod, Associate Professor and Founding Director, CASTLE, University of Kentucky. These rich illustrations of technology leadership in secondary schools show how a number of complex variables must come together to produce the key outcome of positioning educational technology as a support to teaching and learning. Examples of leadership practices that coordinate team members for interdependent work and invite teachers' involvement should prove to be a valuable resource to practitioners and also provide insight to policymakers for how they can create supportive conditions for

such work Sara Dexter Associate Professor Department of Leadership Foundations and Policy Curry School of Education University of Virginia *Leading Technology Rich Schools* is a key advance in understanding how technology can best be integrated in today's schools These case studies of effective practice are sure to become required reading for those in leadership positions who are using technology for school improvement Glen L Bull Samuel Braley Gray Professor of Education Curry School of Education University of Virginia *The rubber meets the road* in this well researched book with detailed stories of exemplary schools and school leaders that have leveraged technology as a key tool to make significant reforms stick Through these vivid case studies Levin and Schrum illuminate a dynamic and complex set of lessons learned to help all school leaders undertake transformations of their schools L Michael Golden CEO Educurious *Pacesetters in Innovation* United States. Office of Education, 1966
