

Population Dynamics

Topic: Population Dynamics

Week 10: Exam

Student: Anna Schmitt

Answer the following questions by clicking on the correct answer. You have 10 minutes to complete the exam.

1. The exponential model

a) The exponential model is a model that describes population growth over time. It is based on the assumption that the population grows at a constant rate. This model is only applicable to populations that are not limited by resources.

2. The exponential growth model

Answer the following questions by clicking on the correct answer.

1. The exponential growth model is based on the assumption that the population grows at a constant rate.

True

2. The exponential growth model is only applicable to populations that are not limited by resources.

True. Exponential growth is only possible in populations that are not limited by resources.

3. Exploring the Exponential Growth Model

Answer the following questions by clicking on the correct answer.

1. If the growth rate (intrinsic rate) of a population is constant, then the population growth is exponential. This is true for all populations that are not limited by resources.

Exponential growth is only possible in populations that are not limited by resources.

2. Exponential growth is only possible in populations that are not limited by resources. This is true for all populations that are not limited by resources.

Variable	Exponential Growth	Exponential Decay
N	Population size	Population size
r	Constant	Constant
K	Population growth rate	0
t	Time	Time
N_0	Initial population size	Initial population size

Exponential growth is only possible in populations that are not limited by resources.

3. Exponential growth is only possible in populations that are not limited by resources. This is true for all populations that are not limited by resources.

True. Exponential growth is only possible in populations that are not limited by resources.
