Expanding Underground - Knowledge and Passion to Make a Positive Impact on the World Georgios Anagnostou,Andreas Benardos,Vassilis P. Marinos,2023-04-12 Expanding Underground Knowledge and Passion to Make a Positive Impact on the World contains the contributions presented at the ITA AITES World

Tunnel Congress 2023 Athens Greece 12-18 May 2023 Tunnels and underground space are a predominant engineering practice that can provide sustainable, cost efficient and environmentally friendly solutions to the ever growing needs of modern societies. This underground expansion in more diverse and challenging infrastructure types or to novel underground uses can foster the changes needed. At the same time the tunneling and underground space community needs to be better prepared and equipped with knowledge, tools and experience to deal with the prevailing conditions to successfully challenge and overcome adversities on this path. The papers in this book aim at contributing to the analysis of challenging conditions, the presentation and dissemination of good practices, the introduction of new concepts, new tools and innovative elements that can help engineers and all stakeholders to reach their end goals.

Expanding Underground Knowledge and Passion to Make a Positive Impact on the World covers a wide range of aspects and topics related to the whole chain of the construction and operation of underground structures. **Knowledge and Passion to Expand Underground for Sustainability and Resilience** Geological, Geotechnical Site Investigation and Ground Characterization, Planning and Designing of Tunnels and Underground Structures, Mechanised Tunnelling and Microtunnelling, Conventional Tunnelling, Drill and Blast Applications, Tunnelling in Challenging Conditions, Case Histories and Lessons Learned, Innovation, Robotics and Automation, BIM, Big Data and Machine Learning Applications in Tunnelling, Safety, Risk and Operation of Underground Infrastructure and Contractual Practices, Insurance and Project Management. The book is a must have reference for all professionals and stakeholders involved in tunneling and underground space development projects. **Portogallo** Regis St. Louis, 2011-11-16

Urban Transformations: Centres, Peripheries and Systems Daniel P. O'Donoghue, 2016-02-11 Definitions of urban entities and urban typologies are changing constantly to reflect the growing physical extent of cities and their hinterlands. These include suburbs, sprawl, edge cities, gated communities, conurbations and networks of places and such transformations cause conflict between central and peripheral areas at a range of spatial scales. This book explores the role of cities, their influence and the transformations they have undertaken in the recent past. Ways in which cities regenerate, how plans change, how they are governed and how they react to the economic realities of the day are all explored. Concepts such as polycentricity are explored to highlight the fact that cities are part of wider regions and the study of urban geography in the future needs to be cognisant of changing relationships within and between cities. Bringing together studies from around the world at different scales from small town to megacity, this volume captures a snapshot of some of the changes in city centres, suburbs and the wider urban region. In doing so it provides a deeper understanding of the evolving form and function of cities and their associated peripheral regions as well as their impact on modern twenty first century landscapes. **Heritage in Eight Acts** Rodrigo Christofoletti, 2024-12-17 Heritage in Eight Acts brings together contributions on cultural heritage at an international level with an emphasis on Latin American and Ibero American studies addressing points of convergence between the local and the global in an accessible and direct way. It discusses themes that have gained importance on the

heritage preservation agenda signaling how Latin America and Europe have expanded their connections and actions in favor of the multiplicity of heritage Eight scholars from diverse backgrounds bring critical and nuanced understandings of heritage to the context of international relations From architecture to history and from archeology to art history each contribution displays methodological creativity and analytical depth The result is a synthesis with the impact of showing how points of connection can bring Latin America closer to Europe but not from a relationship of subalternity but of shared protagonism
