Nietzsche, Wagner, Europe Martine Prange, 2013-08-29 Friedrich Nietzsche 1844 1900 supported the unification of Europe and reflected on this like few other philosophers before or after him Many of his works are concerned with the present state and future of European culture and humanity Resisting the nationalist nonsense and politics of dissolution of his day he advocated the birth of good Europeans i e supra national individuals and the amalgamation of nations Nietzsche Wagner Europe analyzes the development of Friedrich Nietzsche's ideal of European culture based on his musical aesthetics It does so against the background of contemporary searches for a wider cultural meaning beyond Europe's economic political union The book claims that Nietzsche always propagated the aestheticization of Europe but that his view on how to achieve this

changed as a result of his dramatically altering philosophy of music The main focus is on Nietzsche s passion for and later aversion to Wagner s music and in direct connection with this his surprising embrace of Italian operas as new forms of Dionysian music and of Goethe as a model of Good Europeanism
