Glass Construction Manual Christian Schittich, Gerald Staib, Dieter Balkow, Matthias Schuler, Werner Sobek, 2012-12-10

Glass offers a wide variety of possible applications for the realization of even the most ambitious designs in architecture and in the past two decades it has experienced an unparalleled burst of innovation. For planners this means working constantly with this high performance material. In compact and appealing form the completely revised Glass Construction Manual presents the current state of the art on planning and building with glass from the history through the technical foundations all the way to the most innovative applications. Astonishing perspectives on thermal insulation and solar protection and the addition of thoughtfully selected new practical examples round off this comprehensive reference work.

Current Applications of Engineered Wood, 2023-11-08

Wood is one of the traditional materials used in construction applications and there is a wide range of engineered wood products available for construction. Engineered wood is a wood product derived from wood waste and byproducts such as sawdust from hardwoods and softwoods. Engineered wood types include particleboard, plywood, fiberboard, oriented strand board (OSB), laminated veneer lumber (LVL), glued laminated timber (GLT), and cross laminated timber (CLT). This book provides a detailed introduction to the development history of engineering wood and its raw materials, applications and advantages and disadvantages. It also compares different types of engineering wood and discusses modification of engineering wood, testing standards for mechanical properties of engineering wood, anti corrosion and degradation.
