A General-purpose Security Framework Miquel Colobran Huguet, 2015 La Informàtica ha sofert grans transformacions al llarg de la seva curta història Va començar amb grans màquines en entorns especialitzats i molt restringits i s'ha convertit en petits dispositius que formen part de la societat i la vida quotidiana de totes les persones La seguretat ha estat una de les rees més afectades per aquests canvis i ha sofert grans canvis també a nivell tecnològic Per aquesta raó creiem que la definició tradicional de la seguretat informàtica és insuficient sobretot si tenim en compte les noves seguretats que han aparegut en altres rees de coneixement La definició actual prové dels anys 70 i la seguretat al segle XXI és conceptualment més rica i pràctica diferent Per tant l'objectiu principal d'aquesta tesi és revisar el concepte mateix de seguretat informàtica per tal de proposar una definició juntament amb un model genèric que permeti una implementació Per tal d'aconseguir-ho es proposa un anàlisi del concepte El mètode d'anàlisi es basa en múltiples conceptes d'obtenció de coneixement utilitzats en l'enginyeria del coneixement El model conceptual es realitza utilitzant el diagrama de classes UML com un llenguatge gràfic de representació El mètode proposat s'aplica a un conjunt de fonts seleccionades pr

viament per tal d'obtenir el model. El model conceptual del concepte de seguretat s'expressa com un conjunt de conceptes i relacions entre conceptes. En base al model genèric proposat es realitza una descripció formal del concepte de seguretat i finalment el model s'implementa per mitjà d'un sistema basat en el coneixement utilitzant una ontologia. En conseqüència les contribucions principals de l'estudi són el desenvolupament d'una metodologia d'anàlisi conceptual i una definició de seguretat juntament amb el seu model genèric. El marc de seguretat està descrit en forma algebraica i també és possible implementar-lo utilitzant tecnologies com Java proporcionant mètodes de seguretat. L'estructura de la tesi és la següent: A la part 1 es fa una aproximació teòrica del concepte de seguretat posant especial atenció a altres disciplines no relacionades amb l'enginyeria. Es fa una aproximació històrica de l'estudi del concepte de seguretat tenint cura d'aquells conceptes o models proposats pels experts en el camp de la seguretat no exclusivament en el camp de la seguretat informàtica. La part 2 explica les eines que s'utilitzen per a construir el model. S'utilitzen eines de modelat conceptuals i de coneixement. Es defineix un mètode d'anàlisi i s'utilitza en el disseny del model. A la part 3 es proposa un model genèric de seguretat. L'objectiu és proposar un model integrador que inclogui moltes de les seguretats existents. A més es fa una formulació algebraica del model de seguretat. Finalment la part 4 està dedicada a aplicar el model proposat en un escenari real. Així demostra que el model és operatiu i capaç de mesurar el nivell de seguretat.
