

III. Lesson Proper

A. Motivation

Lead the pupils in singing the song “Bahay Kubo.” (You may sing other songs that promote healthy foods.) Have the pupils share their experiences in eating any of the vegetables mentioned in the song. Then discuss the importance of eating healthy foods.

B. Presentation of the Subject Matter

1. Guide the pupils in answering *Sci-tionary*.
2. Show to the class a basket containing different kinds of food. Make sure that the foods in the basket belong to the three basic food groups. Then, let the pupils identify each food inside the basket.
3. Discuss the important concepts in *Feed Your Mind*. Introduce the three basic food groups using the foods in the basket. Explain the differences of the three basic food groups.
4. Guide the pupils in doing the activity in *Science In Action*.
5. To summarize the lesson, mention the important concepts listed in *Roundup*.
6. Ask the pupils to answer *Brain Challenge*.

C. Synthesis

Distribute pieces of bond paper. Ask the class to bring out their pencils and coloring materials. Then let the pupils show a balanced meal through a drawing. Guide them in doing this activity. Then call on some pupils to show and explain his or her drawing to the class.

IV. Remediation

Bring the class to the school canteen and have the pupils classify the foods sold there according to the three basic food groups.

V. Enrichment

With their parents' consent, bring the pupils to a local farm or a garden for a picnic. Have the pupils bring their own healthy snacks. Let the pupils share their healthy snacks with their classmates. While having a picnic, review the lesson about the three basic food groups.

Lesson 5 You Need Air, Water, and Sunlight

I. Objectives

At the end of the lesson, the pupils will be able to

1. explain the importance of having clean air;
2. explain why people need safe drinking water;
3. tell the importance of having enough exposure to sunlight; and
4. demonstrate ways to help keep the air and water clean.

And there are answers at the back to check that you're on the right path. This engaging and clear workbook accompanies DK's *How to be Good at Science Technology and Engineering* coursebook but can also be used on its own to reinforce classroom teaching.

Motivating Persistence in the Face of Failure Catherine Chi Chase, 2011 Failure often presents a valuable learning opportunity; however, students may need motivational scaffolds to protect them from the negative psychological ramifications of failure. This work explored the effectiveness of a

motivation based intervention called an ego protective buffer EPB that was designed to enhance persistence after failure An ego protective buffer EPB maintains a stable sense of competence by lessening the impact of failure on one's psyche The specific instantiation of an EPB tested here was designed to elicit a combination of internal and external attributions for failure External attributions protect one's sense of competence by averting the blame for failure away from the self while internal attributions encourage students to take some responsibility for remedying the failure situation Based on this theory we embedded an EPB into the rule structure of a computer based genetics game and unleashed it on 143 seventh graders In the EPB condition students were told that winning in the game was a probabilistic outcome dependent on a combination of chance and skill on the part of the students In the Control condition students were told that winning in the game was a deterministic outcome dependent on students skill only Students played the game during two class periods Measures include pre and posttests motivational survey measures and in game behaviors The EPB did have an effect on learning but only amongst high failing students High failing EPB students learned just as much as their low failing counterparts This was not so in the Control condition where high failing students learned far less than their low failing counterparts So the high failing EPB group was behaving as if they were buffered from the effects of failure We also found evidence of a possible mechanism behind this learning effect In the high failing EPB condition students were equally likely to persist after success and failure while in the Control condition students were far more likely to persist after success exhibiting risk averse behaviors This difference was more exaggerated in a within subjects comparison contrasting the same individuals in situations of high and low failure Finally persistence after failure was associated with learning across the full sample of subjects Regardless of condition or failure rate students who persisted more after failure also learned more This study together with the author's related body of work provides compelling evidence that an EPB is a viable intervention for encouraging persistence in the face of failure

Social Science Work? Paul Diesing, 1992-03-15 The culmination of a lifetime spent in a variety of fields sociology anthropology economics psychology and philosophy of science *How Does Social Science Work* takes an innovative sometimes iconoclastic look at social scientists at work in many disciplines It describes how they investigate and the kinds of truth they produce illuminating the weaknesses and dangers inherent in their research At once an analysis a critique and a synthesis this major study begins by surveying philosophical approaches to hermeneutics to examine the question of how social science ought to work It illustrates many of its arguments with untraditional examples such as the reception of the work of the political biographer Robert Caro to show the hermeneutical problems of ethnographers The major part of the book surveys sociological political and psychological studies of social science to get a rounded picture of how social science works Paul Diesling warns that social science exists between two opposite kinds of degeneration a value free professionalism that lives only for publications that show off the latest techniques and a deep social concern that uses science for propaganda He argues for greater self awareness and humility among social scientists although he notes that some social scientists will angrily reject the thought that their personality affects their research in any way This profound and sometimes witty book will appeal to students and practitioners in the social sciences who are ready to take a fresh look at their field An extensive

bibliography provides a wealth of references across an array of social science disciplines
