Educational Technology and Pedagogic Encounters Yusef Waghid, 2016-07-15 This book looks at some of the underlying theories of educational technology means and ways in which this technology is guided in practice ends The authors are intent on producing ends that prepare students to undertake new analyses and evaluations that can result in new possibilities for democratic action Emphasis is on their understanding of and position within educational technology as opposed to using or applying educational technology The work is not written from the point of view that their embeddedness within educational technology has a utilitarian end in mind but rather that their situatedness within educational technology a practice in itself leaves open possibilities for new ways of understanding democratic education This book is organised into six interrelated themes that work towards the cultivation of educational technology as a human practice which guides pedagogic encounters on the basis of taking risks in relation to which the unexpected unimaginable is always possible

Remapping Africa in the Global Space Edward Shizha, 2014-11-26 What are the benefits and risks for Africa's participation in the globalisation nexus Remapping Africa in the Global Space is a visionary and interdisciplinary volume that restores Africa's image using a multidisciplinary lens It incorporates disciplines such as sociology education global studies economics development studies political science and philosophy to explore and theorise Africa's reality in the global space and to deconstruct the misperceptions and narratives that often infantilise Africa's internal and international relations The contributions to this volume are a hybrid of both outsider and insider perspectives that create a balanced critical discourse that can provide standard paradigms that can adequately explain predict or prevent Africa's current misperceptions and myths about the African crisis and failure status The authors provide a holistic and perhaps anticolonial and anti hegemonic perspective that can benefit a wide spectrum of academics scholars students development agents policy makers in both governmental and non governmental organisations and engage some alternative analyses and possibilities for socio politico and economic advancement in Africa The book provides up to date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa The book is brilliant Remapping Africa in the Global Space Propositions for Change explores Africa from the perspective of academics specialised in subject matters pertaining to the continent In this age of globalisation I find this book invaluable It is a good read as it dissects analyses and presents issues affecting the continent in an articulate and cogent way I highly recommend its use in academic institutions Magnus Mfofo M. Carthy Assistant Professor Lyle S Hallman Faculty of Social Work Fellow of Tshepo Institute for the Study of Contemporary Africa Wilfrid Laurier University Kitchener Canada More than anything else Remapping Africa in the Global Space Propositions for Change speaks to the complex multifaceted and interfused character of the development challenges and prospects of Africa Indeed few books have examined contemporary Africa as comprehensively and insightfully as this edited volume it is widely welcomed in the African academic scholarly and research arena Joseph Mensah Professor of

Surface Modification of Biomaterials Rachel Williams, 2010-11-25 The surface modification of biomaterials plays a significant role in determining the outcome of biological material interactions. With the appropriate modification a material's surface can be tailored to improve biocompatibility, adhesion and cell interactions. Consequently, surface modification is vital in the development and design of new biomaterials and medical devices. Surface modification of biomaterials reviews both established surface modifications and those still in the early stages of research and discusses how they can be used to optimise biological interactions and enhance clinical performance. Part one begins with chapters looking at various types and techniques of surface modification including plasma polymerisation, covalent binding of poly ethylene glycol (PEG), heparinisation, peptide functionalisation and calcium phosphate deposition, before going on to examine metal surface oxidation and biomaterial surface topography to control cellular response, with particular reference to technologies, cell behaviour and biomedical applications. Part two studies the analytical techniques and applications of surface modification, with chapters on analysing biomaterial surface chemistry, surface structure, morphology and topography, before moving on to discuss modifying biomaterial surfaces to optimise interactions with blood, control infection, optimise interactions with soft tissues, repair and regenerate nerve cells, control stem cell growth and differentiation and to optimise interactions with bone. The distinguished editor and international team of contributors to Surface modification of biomaterials have produced a unique overview and detailed chapters on a range of surface modification techniques which will provide an excellent resource for biomaterials researchers and scientists and engineers concerned with improving the properties of biomaterials. It will also be beneficial for academics researching surface modification. Reviews both established surface modifications and those still in the early stages of research and how they can be used to optimise biological interactions and enhance clinical performance. Studies analytical techniques and applications of surface modification with chapters assessing biomaterial surface chemistry, surface structure, morphology and topography. Discusses modifying biomaterial surfaces to optimise interactions with blood and soft tissues and also to repair and regenerate nerve cells and control infection. Handbook of Child Psychology and Developmental Science, Ecological Settings and Processes, 2015-03-31 The essential reference for human development theory, updated and reconceptualized. The Handbook of Child Psychology and Developmental Science a four volume reference is the field defining work to which all others are compared. First published in 1946 and now in its Seventh Edition, the Handbook has long been considered the definitive guide to the field of developmental science. Volume 4, Ecological Settings and Processes in Developmental Systems, is centrally concerned with the people, conditions and events outside individuals that affect children and their development. To understand children's development it is both necessary and desirable to embrace all of these social and physical contexts. Guided by the relational developmental systems meta-theory, the chapters in the volume are ordered in a manner that begins with the near proximal contexts in which children

find themselves and moving through to distal contexts that influence children in equally compelling if less immediately manifest ways. The volume emphasizes that the child's environment is complex, multi-dimensional and structurally organized into interlinked contexts; children actively contribute to their development; the child and the environment are inextricably linked; and contributions of both child and environment are essential to explain or understand development. Understand the role of parents, other family members, peers and other adults, teachers, coaches, mentors in a child's development. Discover the key neighborhood, community and institutional settings of human development. Examine the role of activities, work and media in child and adolescent development. Learn about the role of medicine, law, government, war and disaster, culture and history in contributing to the processes of human development. The scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period. There is a paradigm shift that involves increasingly greater understanding of how to describe, explain and optimize the course of human life for diverse individuals living within diverse contexts. This Handbook is the definitive reference for educators, policy makers, researchers, students and practitioners in human development, psychology, sociology, anthropology and neuroscience.

Contemporary Intellectual Assessment Dawn P. Flanagan, Erin M. McDonough, 2022-12-05. In one volume, this authoritative reference presents a current, comprehensive overview of intellectual and cognitive assessment with a focus on practical applications. Leaders in the field describe major theories of intelligence and provide the knowledge needed to use the latest measures of cognitive abilities with individuals of all ages, from toddlers to adults. Evidence-based approaches to test interpretation and their relevance for intervention are described. The book addresses critical issues in assessing particular populations, including culturally and linguistically diverse students, gifted students and those with learning difficulties and disabilities in today's educational settings.
