Scope of Indian Agriculture

Agriculture: - The term agriculture is derived from two Latin words **ager** or **agri** meaning **soil** and **cultura** meaning **cultivation**. Agriculture is a broad term including all aspects of crop production, livestock farming, fisheries, forestry etc.

Agriculture is a branch of applied science. It is the art of farming including the work of cultivating the soil for producing crops and raising livestock. There are three main spheres of agriculture as under;

Geoponic:- meaning cultivation in earth.

Hydroponic:- meaning cultivation in water and

Acroponic:- meaning cultivation in air.

AGRICULTURE is defined in the Agriculture ACT, 1947, as including ‘horticulture, fruit growing, seed growing, dairy farming and livestock breeding and keeping, the use of land as grazing land, meadow land, osier land, market gardens and nursery grounds, and the use of land for woodlands where that use ancillary to the farming of land for Agricultural purposes”.

Agriculture is defined as an art, science and business of producing crops and livestock for economic purposes

Agriculture is a productive unit where the gifts of nature like land, light, water and temperature are integrated into a single primary unit i.e **crop plant** which is indispensable for human beings. The secondary productive units of agriculture are **animals** including **livestock, birds and insects** which feed on the primary units and provide concentrated products such as **meat, milk, hide, wool, eggs, honey, silk and lac**.

Agriculture is considered as mother of all agro-based industries because the development and functioning of all such industries is governed by the raw material supplied from agriculture sector E.g. Textile, Oil, Sugar, Dairy and Canning industries are directly governed by cotton, oilseeds, sugarcane, milk and fruits production, respectively.

The important cultural energies utilized for the production and protection of agricultural commodities are:-

Natural resources:-

Agriculture implies the effective use of land, water, light and other resources of environment through the production of field crops, forage crops, horticultural crops, farm animals, fisheries and forestry.
