quantitatively not only computationally but also explanatorily The next chapter illustrates how one can reduce the level of complexity in understanding the structure and dynamics of scientific knowledge through the design and use of the CiteSpace system for visualizing and analyzing emerging trends in scientific literature The following two chapters explain the concepts of structural variation and the fitness of information in a framework that builds on the idea of fitness landscape originally introduced to study population evolution The final chapter presents a dual map overlay technique and demonstrates how it supports a variety of analytic tasks for a new type of portfolio analysis The Fitness of Information Quantitative Assessments of Critical Evidence also features In depth case studies and examples that characterize far reaching concepts illustrate underlying principles and demonstrate profound challenges and complexities at various levels of analytic reasoning Wide ranging topics that underline the common theme from the subjectivity of evidence in criminal trials to detecting early signs of critical transitions and mechanisms behind radical patents An extensible and unifying framework for visual analytics by transforming analytic reasoning tasks to the assessment of critical evidence The Fitness of Information Quantitative Assessments of Critical Evidence is a suitable reference for researchers analysts and practitioners who are interested in analyzing evidence and making decisions with incomplete uncertain and even conflicting information The book is also an excellent textbook for upper undergraduate and graduate level courses on visual analytics information visualization and business analytics and decision support systems
