Attarian, Catherine Schuman, 2007-06-06 It has been 5 years since publication of the first edition of Dr Attarian's Clinical Handbook of Insomnia which at the time was the first significant clinical textbook dedicated to insomnia an often overlooked but important medical problem The book was very well received There has now been sufficient new information on the subject to warrant a second expanded edition of this very useful volume Then as now the approach is to emphasize the frequent biological causes of insomnia rather than to attribute it primarily to underlying psychological and emotional factors This new edition is an impressive major effort having been expanded from 14 to 23 chapters including an extensive revision and updating of previous chapters with new references and the addition of many new authors An entirely new section of the book deals with insomnia in special populations including teenagers pregnancy menopause and the geriatric population Other new topics include insomnia as encountered in primary care practice the role of circadian rhythms the contribution of sleep related movement disorders to insomnia insomnia in pain disorders and the interesting entity of paradoxical insomnia in which there is a large discrepancy between the objective and subjective estimation of quantity of sleep This collection within a single volume of practical information concerning a common but often neglected disorder remains a very useful addition to the

armamentarium of the general or specialty physician who wishes to properly address insomnia in an informed and responsible manner The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual Ron Martini,2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the boats and unknowingly by family members who can't understand terms like head deck and overhead and who think SOS is a distress signal Canadiana ,1977 **The Handbook of Child and Adolescent Clinical**
